Bell, 1962-06-30 The Hawthorne depicted by Professor Bell in these pages will be as much of a surprise to many readers as is his appearance in the rare 1847 daguerreotype reproduced on the book jacket This virtually unknown portrait says the author corresponds with Samuel Goodrich's description in 1856 of the New England writer his hair dark and bushy his eye steel gray his brow thick his mouth sarcastic his whole aspect cold moody distrustful At this period he had tried his hand in literature and considered himself to have met with a fatal rebuff from the reading world pp 92 93 His sensitiveness to the predicament of the artist in early nineteenth century America when the rush for power money and social prestige relegated creative talent to the dustbin filled Hawthorne's writings with penetrating statements about the artist's fate in the new scientific industrial world statements still applicable today **From Madman to Crime Fighter** Roslynn D.

Haynes, 2017-09-13 *From Madman to Crime Fighter* is the most comprehensive study of the image of the scientist in Western literature and film **The Puritan Origins of American Patriotism** George McKenna, 2008-10-01 In this absorbing book George McKenna ranges across the entire panorama of American history to track the development of American patriotism That patriotism shaped by Reformation Protestantism and imbued with the American Puritan belief in a providential errand

has evolved over 350 years and influenced American political culture in both positive and negative ways McKenna shows The germ of the patriotism an activist theology that stressed collective rather than individual salvation began in the late 1630s in New England and traveled across the continent eventually becoming a national phenomenon Today American patriotism still reflects its origins in the seventeenth century By encouraging cohesion in a nation of diverse peoples and inspiring social reform American patriotism has sometimes been a force for good But the book also uncovers a darker side of the nation s patriotism a prejudice against the South in the nineteenth century for example and a tendency toward nativism and anti Catholicism Ironically a great reversal has occurred and today the most fervent believers in the Puritan narrative are the former outsiders Catholics and Southerners McKenna offers an interesting new perspective on patriotism s role throughout American history and he concludes with trenchant thoughts on its role in the post 9 11 era      Recounting Cultural Encounters Marija Knežević,2009-10-02 Contributions reprinted in this book highlight some of the wide ranging ways in which the issues of culture and identity can be approached in a literary text while focusing on the ways in which cultural encounters have been changing both the world and its reflection in literature The beginning of the twenty first century is an appropriate time to repay careful attention to these issues Understanding how our perception of the Other changes with the concept of the world we inhabit we want to emphasize the rising importance of fostering cultural pluralism and global understanding Having based their research on widespread readings in academia such as deconstruction post colonialism post modernism new historicism and narratology the authors of these papers proceed by addressing the metaphor of travel as one of the strongest metaphors for the evolution of mankind especially if considered under the light of the historically and politically imposed opposition between the progressive western and the static eastern or African societies However as the end of the imperialist era brought about poignant awareness of cultural relativism as well as deconstruction of the great narrative of progress facing the Other as an unconceptualized entity became a major moral concern of a modern traveller It is pronounced that this concern should be textually testified to dramatize the human inability to avoid verbal appropriation of the other The final question we seek to answer is whether the era of advanced technology and globalisation along with a post modern ironical attitude to hyper realities and textual transparencies has rendered the sphere of the text the only available point of concern of contemporary literature and thought in general For its argumentation strongly founded in recent literary studies and humanities in general its interdisciplinary nature and its focus on the actual global problems of abrupt cultural change and exchange its heightened understanding of the necessity of coexistence of differences in a changing world its spirit of tolerance and its international spirit in general we assume this collection will not only attract academic literary scholars but will also appeal to the general reading public      **Paperbound Books in Print ,1960**
