## **The Politics Of Urban Development:**

**The Politics of Urban Development** Clarence Nathan Stone, Heywood T. Sanders, 1987 In the past twenty years the study of urban politics has shifted from a predominant concern with political culture and ethos to a preoccupation with political economy particularly that of urban development. Urban scholars have come to recognize that cities are shaped by forces beyond their boundaries. From that focus have emerged the views that cities are clearly engaged in economic competition that market processes are shaped by national policy decisions sometimes intentionally and sometimes inadvertently and that the costs and benefits of economic growth are unevenly distributed. But what else needs to be said about the policies and politics of urban development? To supplement prevailing theories *The Politics of Urban Development* argues that the role of local actors in making development decisions merits closer study. Whatever the structural constraints politics still matters. Collectively the essays provide ample evidence that local government officials and other community actors do not simply follow the imperatives that derive from the national political economy; they are able to assert a significant degree of influence over the shared destiny of an urban population. The impact of the collection is to heighten awareness of local political practices and of how and why they make a difference.

**The Politics of Urban Cultural Policy** Carl Grodach, Daniel Silver, 2012-12-12 *The Politics of Urban Cultural Policy* brings together a range of international experts to critically analyze the ways that governmental actors and non governmental entities attempt to influence the production and implementation of urban policies directed at the arts, culture and creative activity. Presenting a global set of case studies that span five continents and 22 cities the essays in this book advance our understanding of how the dynamic interplay between economic and political context, institutional arrangements and social networks affect urban cultural policy making and the ways that these policies impact urban development and influence urban governance. The volume comparatively studies urban cultural policy making in a diverse set of contexts analyzes the positive and negative outcomes of policy for different constituencies and identifies the most effective policy directions emerging political challenges and most promising opportunities for building effective cultural policy coalitions. The volume provides a comprehensive and in depth engagement with the political process of urban cultural policy and urban development studies around the world. It will be of interest to students and researchers interested in urban planning, urban studies and cultural studies.

**Cityscapes and Capital** Michael A. Pagano, Ann O'M. Bowman, 1997-09-05 The authors draw on comparative data from 10 medium sized cities and examine 40 city supported development projects to show how city investment in and regulation of development projects is the most effective way for political leaders to control and shape the future of their city. 19 illustrations.

**The Politics of Urban Planning** William Carl Johnson, 1989 **The Oxford Handbook of Urban Politics** Karen Mossberger, Susan E. Clarke, Peter John, 2012-04-05 *The Oxford Handbook of Urban Politics* is an authoritative volume on an established subject in political science and the academy more generally urban politics and urban studies. The editors are all

recognized experts and are well connected to the leading scholars in urban politics. The book covers the major themes that animate the subfield: the politics of space and place, power and governance, urban policy, urban social organization, citizenship and democratic governance, representation and institutions, approaches and methodology, and the future of urban politics. Given the caliber of the editors and proposed contributors, the volume should set the intellectual agenda for years to come.

**Cities in the International Marketplace** H. V. Savitch, Paul Kantor, 2018-06-05 Does globalization menace our cities? Are cities able to exercise democratic rule and strategic choice when international competition increasingly limits the importance of place? *Cities in the International Marketplace* looks at the political responses of ten cities in North America and Western Europe as they grappled with the forces of global restructuring during the past thirty years. H. V. Savitch and Paul Kantor conclude that cities do have choices in city building and that they behave strategically in the international marketplace. Rather than treating cities through case studies, this book undertakes rigorous systematic comparison. In doing so, it provides an innovative theory that explains how city governments bargain in the capital investment process to assert their influence. The authors examine the role of economic conditions and intergovernmental politics as well as local democratic institutions and cultural values. They also show why cities vary in their approaches to urban development. They portray how cities are constrained by the dynamics of the global economy but are not its prisoners. Further, they explain why some urban communities have more maneuverability than do others in the economic development game. Local governance, culture and planning can combine with economic fortune and national urban policies to provide resources that expand or contract the scope for choice. This clearly written book analyzes the political economy of development in Detroit, Houston and New York in the United States, Toronto in Canada, Paris and Marseilles in France, Milan and Naples in Italy, and Glasgow and Liverpool in Great Britain.

**The Dependent City Revisited** Paul Kantor, 1995-05 Here is a book that makes sense of the L.A. riots, homelessness, tax giveaways and the other big urban issues that are back in the national spotlight. In this streamlined and updated new edition of his classic book *The Dependent City*, Paul Kantor now focuses on economic development and social welfare policies to reveal the key dilemmas of American urban politics. Returning to a political economy theme, Kantor explores how city governments have struggled to escape and accommodate the reality of their economic dependency in the policies that they've pursued. Revisiting cities across the nation, Kantor finds not only that they have become more dependent but also that the character of this dependency has changed and deepened. Exploring local regimes in the Frostbelt and Sunbelt and in suburbia, he finds that they frequently act more like captives of big business rather than as representatives of citizens. Local attempts to promote social justice increasingly run up against a wall of economic dependency created by federal policies and business power. This book signals how American cities can find ways of overcoming this dependency by working together with states and the federal government to promote healthy democratic urban politics. *The Dependent City Revisited* is an accessible, provocative supplement for a wide variety of courses in urban studies and political economy as well.

as stimulating reading for anyone who is interested in understanding America's urban mosaic *The Politics of Urban Planning Policy* Efraim Torgovnik, 1990-08-09 This book examines how policy decisions have been made on urban development in Israel's two largest cities Tel Aviv and Jerusalem. It shows the influence of such factors as the Israeli system's structural features, the institutionalized arrangements between the national and urban governments and the changing rules of these arrangements and the processes by which the state tries to intervene in local issues. Contents The Political and Organizational Framework of Planning The Implementation of Urban Policy Structural Determinants of Planning Policy Normative Determinants of Planning Policy Central Local Parallel Planning The Politics of Urban Growth Co published with the Jerusalem Center for Public Affairs *Building the New Berlin* Elizabeth A. Strom, 2001-02-07 Appraising the redevelopment of Berlin since the late nineteenth century Elizabeth A. Strom details how the contests between politicians, bureaucrats, architects and developers have become especially prominent since reunification. Whether addressing the historical struggle to shape the city into the important world capital that it is today, charting the re-creation of Berlin as a national government center or exploring the city's massive economic restructuring *Building the New Berlin* illustrates the intimate relationship between architecture and politics in an ongoing dialogue about whom the city should serve. Strom suggests that Berlin is a unique case study of city building in the twentieth century due to Berlin's turbulent battles over the central city, the seat of national and local governance. Nonetheless, these tensions provide fertile ground for the study of the central questions of urban political economy. Strom has fashioned an accessible, well-written and perceptive study that not only is a valuable addition to urban development literature but also provides a foundational understanding of the debate and controversy in the planning of Berlin's city center in the 1990s **Planning Against the Political** Jonathan Metzger, Philip Allmendinger, Stijn Oosterlynck, 2014-07-11 This book brings together a number of highly innovative and thought-provoking contributions from European researchers in territorial governance related fields such as human geography, planning studies, sociology and management studies. The contributions share the ambition of highlighting troubling contemporary tendencies where spatial planning and territorial governance can be seen to circumscribe or subvert due democratic practice and the democratic ethos. The book also functions as an introduction to some of the central strands of contemporary political philosophy, discussing their relevance for the wider field of planning studies and the development of new planning practices.

**The Politics of Urban Fiscal Policy** Terrence J McDonald, Sally K. Ward, 1984-10 The existing literature on urban history focuses chiefly on the social aspects while political and fiscal components of urban history have been almost completely ignored This book addresses the important question of urban fiscal policy giving the issue an historical and theoretical perspective with a strong empirical base **Constructing the Capital City** Suzanne Harris-Brandts, 2020 The late 20th century saw significant geopolitical shifts as empires disintegrated and socialist unions collapsed The result was not only a rise in independent states but the emergence of a distinct form of governance known as the hybrid regime In Eurasia twelve such regimes surfaced Having undergone dramatic politico economic change many turned toward capital city building This dissertation investigates the utility of constructing the capital to such regimes synthesizing theory from architecture urban planning political science and political geography It asks How do incumbent parties in hybrid regimes retain power through urban development and image making What effects are there on the built environment and the long term trajectories of these countries To answer these questions I conducted an in depth analysis of the two Eurasian capitals most heavily mired in hybrid regime politics Tbilisi Georgia and Skopje North Macedonia Both underwent dramatic state and nation building after socialism's collapse in the 1990s They represent the widest array of incumbent party tactics used to increase party authority through urban development and are therefore useful cases to study In Tbilisi I foreground initiatives by the United National Movement UNM government of President Mikheil Saakashvili 2004-2013 In Skopje the emphasis is on the Skopje 2014 campaign instigated by the VMRO DPMNE government of Prime Minister Nikola Gruevski 2006-2016 Using qualitative mixed methods semi structured interviews focus groups site observations document and media analysis the findings show that urban development and its correlated image making are often extensively manipulated to entrench incumbent party authority Although these campaigns promised national pride economic growth and improved living conditions they resulted in geopolitical tensions subnational discord charges of corruption and far reaching legal manipulations Patronage networks informal institutions and populist ideology supported the power of the ruling elite at the

detriment of developing the country The built environment impacts were equally concerning resulting in dysfunctional cityscapes that were over saturated with contentious monuments and poorly constructed buildings The research findings thus underscore the highly politicized processes of constructing capitals in hybrid regimes offering insight into how civil society and international donors might work to hold incumbent parties accountable     *Urban Politics* Stephen J.

McGovern,2016-02-16 Steve McGovern s Urban Politics A Reader examines the changing structure of political power in cities through the lens of historical development accompanied with brief explorations of pertinent public policy issues Having studied and taught urban politics for over 20 years McGovern Haverford College foregrounds his approach with a discussion of cities in a global era and then divides the material into five parts or themes the formation of city politics city politics under stress the politics of urban revitalization the changing dynamics of urban politics and visions of contemporary urban politics He expands the scope of his exploration by integrating literature that is not commonly observed in urban politics texts i e works by journalists as well as scholars and by including debates about political power in both big and smaller cities     *The Mysteries of the Great City* John D.
