**Landscape and Culture - Cross-linguistic Perspectives** Helen Bromhead, 2018-09-07 The relationship between landscape and culture seen through language is an exciting and increasingly explored area. This ground breaking book contributes to the linguistic examination of both cross cultural variation and unifying elements in geographical categorization. The study focuses on the contrastive lexical semantics of certain landscape words in a number of languages. The aim is to show how geographical vocabulary sheds light on the culturally and historically shaped ways people see and think about the land around them. Notably the study presents landscape concepts as anchored in a human centred perspective based on our cognition vision and experience in places. The Natural Semantic Metalanguage NSM approach allows an analysis of meaning which is both fine grained and transparent. The book is aimed first of all at scholars and students of linguistics. Yet it will also be of interest to researchers in geography environmental studies anthropology cultural studies Australian Studies and Australian Aboriginal Studies because of the book's cultural take

**The Precipice** Toby Ord, 2020-03-05 What existential threats does humanity face? And how can we secure our future? *The Precipice* is a powerful book. Ord's love for humanity and hope for its future is infectious. Spectator. Ord's analysis of the science is exemplary. Thrillingly written *Sunday Times*. We live during the most important era of human history. In the twentieth century we developed the means to destroy ourselves without developing the moral framework to ensure we won't. This is the Precipice and how we respond to it will be the most crucial decision of our time. Oxford moral philosopher Toby Ord explores the risks to humanity's future from the familiar man-made threats of climate change and nuclear war to the potentially greater more unfamiliar threats from engineered

pandemics and advanced artificial intelligence. With clear and rigorous thinking Ord calculates the various risk levels and shows how our own time fits within the larger story of human history. We can say with certainty that the novel coronavirus does not pose such a risk. But could the next pandemic? And what can we do in our present moment to face the risks head on? A major work that brings together the disciplines of physics biology earth and computer science history anthropology statistics international relations political science and moral philosophy. *The Precipice* is a call for a new understanding of our age a major reorientation in the way we see the world our history and the role we play in it
