on principal preparation in countries throughout the world The authors examine the dynamic changes that are affecting the way principals work and transforming the world of educational leaders *The Principalship* Lawrence F. Rossow, Linda Sue Warner, 2000 In this book Rossow and Warner incorporate the best of all the advances in the theories and developments in the field on study devoted to the principalship since 1990 Although the titles to the eleven chapters remain the same as those found in the first edition much has changed Since many areas addressed in the first edition are nearly timeless some topics are presented again One of the basic premises in the first edition came from a clear change in the direction the principalship was taking in the late 1980s and early 1990s There was a movement away from principal as manager of people and a building to principal as instructional leader Unlike a number of movements in education which turn out to be merely fads there has been no change in this direction for principalship The literature and the training for future principals continues to capture the concept that principals must be instructional leaders while attending to the safety of students and teachers This book will assist those responsible for the education of principals as well as help those already in the field become updated on the newest advances in the discipline *The Principalship* Frederick C. Lunenburg, Beverly J. Irby, 2022-08-04 Today s emphasis on student learning outcomes coupled with federal legislation to that end has placed more demands on the role of the principal than ever before in our nation s history To address the heightened demands for greater accountability for student learning *The Principalship* uses a learning centered approach one that emphasizes the role of the principal as the steward of the school s vision learning for all The critical aspects of the teaching learning process are addressed here including student motivation individual differences classroom management assessing student learning and developing maintaining and changing school culture In addition several topics not found in other principalship texts are addressed including school safety special education gifted education bilingual education nontraditional organizational structures gender inclusive theories diversity ethics political and policy context human resource management legal issues and collective bargaining The book is documented extensively throughout and grounded in the latest research and theory with suggestions for applying theory to practice reflecting cutting edge research and topical issues facing principals in schools today

Navigating the Principalship James P. Spillane, Rebecca Lowenhaupt, 2019-08-19 In *Navigating the Principalship* James P. Spillane and Rebecca Lowenhaupt look at the major challenges of the principal position, examining how new principals adapt to the role, set an instructional agenda, and build cooperation and collaboration. They focus in particular on the dilemmas that mark the principalship: the inevitable complicated conflicts that arise from a clash of worthwhile values and resist simple solutions; such as addressing the demands of various internal and external stakeholders; accomplishing seemingly limitless tasks in limited time; sharing leadership duties while maintaining ultimate responsibility for the school and everyone in it; creating a safe space for teaching and learning while building bridges to the outside world; balancing work life and home life. Based on original research conducted with new principals in an urban environment and rich with authentic voices discussing real conflicts and proven strategies, this book presents pragmatic ways to manage the most difficult parts of the job. Use it to spark both reflection and action and chart a course for effective rewarding school leadership.

The Principalship Frederick C. Lunenburg, Beverly J. Irby, 2022-08-04 Today's emphasis on student learning outcomes coupled with federal legislation to that end has placed more demands on the role of the principal than ever before in our nation's history. To address the heightened demands for greater accountability for student learning, *The Principalship* uses a learning-centered approach, one that emphasizes the role of the principal as the steward of the school's vision, learning for all. The critical aspects of the teaching-learning process are addressed here, including student motivation, individual differences, classroom management, assessing student learning, and developing, maintaining, and changing school culture. In addition, several topics not found in other principalship texts are addressed, including school safety, special education, gifted education, bilingual education, nontraditional organizational structures, gender-inclusive theories, diversity, ethics, political and policy context, human resource management, legal issues, and collective bargaining. The book is documented extensively throughout and grounded in the latest research and theory, with suggestions for applying theory to practice, reflecting cutting-edge research, and topical issues facing principals in schools today.

The Principalship: Foundations and Functions James M. Lippam,James A. Hoeh,1974 What's Worth Fighting for in the Principalship? Michael Fullan,2014-05-14 The role of the school principal has never been an easy one and it is continually becoming more diverse and complex as the needs and demands of today's society change This book is designed to help principals and teacher leaders fight for fundamentally positive changes that will benefit themselves and their students Because principals are very often overloaded either with what they are actually doing or with all the things they think they should be doing their actions however unintentionally are frequently shaped by outside events and or the actions or directions of others In the heart of this book Guidelines for Action the author helps principals break the cycle of dependency

both for themselves and for those with whom they work

The Principal and School Improvement Amanda

Heffernan, 2018-07-30 This book investigates the localised effects of reform by exploring the impact of a school improvement policy agenda on the work of three experienced principals. It presents three longitudinal case studies within a shared specific leadership context in Queensland, Australia. The case studies enable an exploration of the way the principalship in this context has evolved over time, providing deep insights into the practices and beliefs of three experienced school leaders working in a period of rapid and urgent systemic reform. The nature of global reform policy borrowing means that the research and the findings within this monograph are relevant for international audiences. The book describes a new way to understand and theorise the effects of reform policies and associated pressures on school leaders. Using post-structural theory, it provides a better understanding of the specific effects of reform policy ensembles, particularly when combined with an analysis of the ways policy and discourse work together at a wider level to create an environment that disciplines the principalship. Further, it sheds light on the means of complying with or contesting policy influences and how the work of leaders has changed over time.

What's Worth Fighting for in the Principalship? Michael Fullan, 1988 The premise of this book about the new role of the principalship is that the educational system fosters principals' dependency. Effective school administration is based on empowerment and collaboration. This book examines the problem of dependency and how to overcome it. Section 1 describes the nonrational world of the principal, challenges to the principalship, and changes in the principal's role. Conservative practices that limit principals' success and reinforce dependency are identified. The theme of the second section, New Conceptions of the Principalship, is that the present system is not working. Essential concepts and qualities of the new principal are outlined. Action guidelines for three parts of the problem are offered in section 3: 1. advice to incumbent principals on what's worth fighting for; 2. suggestions for school boards and system administrators; and 3. ideas for fostering the central role of perpetual learning. 38 references.
