**Problem of Increasing Human Energy** Nikola Tesla, 2020-10-27 The Problem of Increasing Human Energy is an essay written by Nikola Tesla to honor his agreement with the editor of The Century Magazine to produce an article on his findings In this essay Tesla explained the superiority of the wireless system he envisioned but the article was more of a lengthy philosophical treatise than an understandable scientific description of his work He contemplates on how a man should utilize his time and body what makes a man productive in his highest capacity and what increases man s energy in the human capacity Tesla approaches human potential energy from the physics perspective tying it to the mass speed and removal of retarding forces When human civilization was just starting to impact the natural world Tesla was already worrying about

problems of overpopulating and running out of renewable resources. He was not only pointing this out but he was already working out the solutions. *The Problem of Increasing Human Energy* Nikola Tesla, 2007-01-01 Part philosophical ponderings on humanity's relationship to the universe part scientific extrapolation on what technological advancement might bring to that understanding this long essay first published in Century Illustrated Magazine in June 1900 is yet another example of the genius of Serbian inventor NIKOLA TESLA 1857-1943 the revolutionary scientist who forever changed the scientific fields of electricity and magnetism. From the possibilities presented by robotics to the civilizing potency of aluminum from a self-acting engine to one of the first proposals to use solar power to run industrial civilization and much more this is a wide-ranging but illuminating look into the thoughts of an unsung hero of scientific philosophy. **The Problem of Increasing Human Energy, With Special References to the Harnessing of** Nikola Tesla, 2013-07-01 Part philosophical ponderings on humanity's relationship to the universe part scientific extrapolation on what technological advancement might bring to that understanding this long essay first published in Century Illustrated Magazine in June 1900 is yet another example of the genius of Serbian inventor NIKOLA TESLA 1857-1943 the revolutionary scientist who forever changed the scientific fields of electricity and magnetism.
