

(b) Direct costs are production costs.

Discussion: A, B, and C are production costs, whereas selling & administration costs are period costs.

(b) Last month 200,000 units of a product were manufactured, and the total cost per unit was \$200. The cost of production for the variable cost is \$200 per unit and the fixed cost is \$200 per unit. If 200,000 units are manufactured the next month, and the costs remain within the same relevant range.

(b) These costs do not reflect variable costs.

(b) Direct costs will increase in total.

(c) Variable cost per unit will increase.

**(d) ~~Present cost per unit will decrease~~**

Discussion: Presently the variable cost is \$200 + \$100,000 ÷ 200,000 units = \$200 + \$500 = \$250 per unit. If 200,000 units are manufactured the cost of \$200,000 + \$100,000 ÷ 200,000 units = \$200,000 + \$500 = \$250,000. The total cost per unit is \$250,000 ÷ 200,000 units = \$250 per unit. Consequently, when production increases, Present cost per unit decreases because the extra fixed cost is spread over more units, resulting cost per unit will decrease.

(b) The following costs are incurred in the following:

|                         |           |
|-------------------------|-----------|
| Direct materials        | \$100,000 |
| Direct labor            | \$10,000  |
| Manufacturing overhead  | \$11,000  |
| Selling expenses        | \$10,000  |
| Administrative expenses | \$11,000  |

Discussion: Manufacturing the relevant cost:

(b) \$110,000

(b) \$120,000

**(d) ~~\$130,000~~**

(b) \$140,000

Discussion: Present costs are direct labor and direct manufacturing costs.

(b) ~~Present~~ Direct labor costs \$100 per unit. In 200,000 the corresponding fixed cost is \$100,000. The relevant costs are the following:

|   |           |
|---|-----------|
| Present direct labor                    | \$100,000 |
| Present cost of sales                   | \$100,000 |
| Present variable & administration costs | \$100,000 |
| Present selling & administration costs  | \$100,000 |

What is the total contribution of the relevant manufacturing margin?

(b) \$100,000

(b) \$100,000

**(d) ~~\$100,000~~**

(b) \$100,000

Discussion: Present Cost Method: \$100 + \$100 + \$100 + \$100 = \$400. Present Variable Cost: Present Sales - Present Variable Costs. Present Sales = \$100,000 + \$100,000 = \$200,000. Present Variable Costs = \$100,000 + \$100,000 = \$200,000.
