2014 Exemplar November Physical Science Grade 11:

Cognitive Modeling in Perception and Memory J G W Raaijmakers, Robert Goldstone, Mark Steyvers, Amy Criss, Robert Nosofsky, 2015-02-11 The work of Richard M Shiffrin has highly impacted the field of cognitive science and current developments within perception and memory have been influenced by his ideas In this volume several key figures in the field will comment on these developments and put them in a wider perspective Although many theories and models have been presented in recent years for various aspects of human cognition there have not been many comparative evaluations that focus on how these models have really advanced our understanding of the underlying mechanisms This volume will be a valuable source of information for both cognitive scientists working in the field and researchers and students looking for a clear accessible presentation of the key problems in cognitive science Highlighted sections include attention and perception memory functions and processes knowledge representation and semantics modelling approaches and applications Dying in America Institute of Medicine, Committee on Approaching Death: Addressing Key End-of-Life Issues, 2015-03-19 For patients and their loved ones no care decisions are more profound than those made near the end of life Unfortunately the experience of dying in the United States is often characterized by fragmented care inadequate treatment of distressing symptoms frequent transitions among care settings and enormous care responsibilities for families According to this report the current health care system of rendering more intensive services than are necessary and desired by patients and the lack of coordination among programs increases risks to patients and creates avoidable burdens on them and their families Dying in America is a study of the current state of health care for persons of all ages who are nearing the end of life Death is not a strictly medical event Ideally health care for those nearing the end of life harmonizes with social psychological and spiritual support All people with advanced illnesses who may be approaching the end of life are entitled to access to high quality compassionate evidence based care consistent with their wishes Dying in America evaluates strategies to integrate care into a person and family centered team based framework and makes recommendations to create a system that coordinates care and supports and respects the choices of patients and their families The findings and recommendations of this report will address the needs of patients and their families and assist policy makers clinicians and their educational and credentialing bodies leaders of health care delivery and financing organizations researchers public and private funders religious and community leaders advocates of better care journalists and the public to provide the best care possible for people nearing the end of life *Managing the Insider Threat* Nick Catrantzos, 2022-11-30 Managing the Insider Threat No Dark Corners and the Rising Tide Menace Second Edition follows up on the success of and insight provided by the first edition reframing the insider threat by distinguishing between sudden impact and slow onset aka rising tide insider attacks This edition is fully updated with coverage from the previous edition having undergone extensive review and revision including updating citations and publications that have been published in the last decade Three new chapters drill down into the advanced

exploration of rising tide threats examining the nuanced complexities and presenting new tools such as the loyalty ledger Chapter 10 and intensity scale Chapter 11 New explorations of ambiguous situations and options for thwarting hostile insiders touch on examples that call for tolerance friction or radical turnaround Chapter 11 Additionally a more oblique discussion Chapter 12 explores alternatives for bolstering organizational resilience in circumstances where internal threats show signs of gaining ascendancy over external ones hence a need for defenders to promote clearer thinking as a means of enhancing resilience against hostile insiders Coverage goes on to identify counters to such pitfalls called lifelines providing examples of questions rephrased to encourage clear thinking and reasoned debate without inviting emotional speech that derails both The goal is to redirect hostile insiders thereby offering alternatives to bolstering organizational resilience particularly in circumstances where internal threats show signs of gaining ascendancy over external ones hence a need for defenders to promote clearer thinking as a means of enhancing resilience against hostile insiders Defenders of institutions and observers of human rascality will find in *Managing the Insider Threat Second Edition* new tools and applications for the No Dark Corners approach to countering a vexing predicament that seems to be increasing in frequency scope and menace

Resources in Education ,1986 **Environment and Society** Wendy Wiedenhoft Murphy,2025-12-10 *Environment and Society Sustainability in the Age of Climate Change* by Wendy Wiedenhoft Murphy explores the intricate relationship between human societies and the natural environment through a sociological lens emphasizing the urgent need for sustainability in the face of climate change By integrating environmental sociology and sustainability studies this book highlights the roles of governments activists and individuals in fostering a just and sustainable future urging readers to reimagine their communities and take collective responsibility for the planet [Annual Report](#) India. Department of School Education & Literacy,2014 *The Cognition of Sequences* Snehlata Jaswal,2018-01-24 It is impossible to perceive the innumerable stimuli impinging on our senses all at once Out of the myriad stimuli external and internal a few are selected for further processing and even among these we try to put each in some sort of relation with the others to be able to make some sense about them all Time of course is an elementary dimension we use to organize our experiences Thus the perception of sequences is basic to human cognition Nevertheless research addressing sequences is rather sparse Partly this is due to difficulty in designing experiments in this area due to huge individual differences Then there is the assumption that temporal order has more to do with memory than perception Another problem is that sequences seem endemic to the auditory world So much so that some researchers have suggested that sound provides the auditory scaffolding for sequencing behavior Little wonder that research studies addressing sequences in modalities other than audition are extremely rare This research topic aimed to gather a holistic picture of sequencing behaviour among humans by collecting snapshots of the current research on the topic of sequencing We particularly sought contributions which addressed sequences beyond the auditory modality The single unifying criteria for these diverse contributions was that they shed new light on previously unexplored

empirical relationships and or provoked new lines of research with incisive ideas regarding sequencing behavior Seasoned researchers contributed their views on perception memory and production of sequences

Supply Chain Management in the Drug Industry Hedley Rees,2011-04-06 This book bridges the gap between practitioners of supply chain management and pharmaceutical industry experts It aims to help both these groups understand the different worlds they live in and how to jointly contribute to meaningful improvements in supply chains within the globally important pharmaceutical sector Scientific and technical staff must work closely with supply chain practitioners and other relevant parties to help secure responsive cost effective and risk mitigated supply chains to compete on a world stage This should not wait until a drug has been registered but should start as early as possible in the development process and before registration or clinical trials The author suggests that CMC chemistry manufacturing controls drug development must reset the line of sight from supply of drug to the clinic and gaining a registration to the building of a patient value stream Capable processes and suppliers streamlined logistics flexible plant and equipment shorter cycle times effective flow of information and reduced waste All these factors can and should be addressed at the CMC development stage
