**The Production of Hospice Space** Sarah McGann,2016-03-03 Challenging the widely held notion of a hospice as a building or a place this book argues that it should instead be a philosophy of care It proposes that the positive and negative impact that space can have in the pursuit of an ideal such as hospice care has previously been underestimated Whether it be a purpose built hospice part of a hospital a nursing home or within the home a hospice is anchored by space and spatial practices and these spatial practices are critical for a holistic approach to dying with dignity Such spatial practices are understood as part of a broad architectural social conceptual and theoretical process By linking health social and architectural theory and establishing conceptual principles this book defines hospice as a philosophy that is underpinned by space and spatial practice In putting forward the notion of hospice space removed from the bounds of a

specific building type it suggests that hospice philosophy could and should be available within any setting of choice where the spatial practices support that philosophy be it home nursing home hospice or hospice friendly hospitals [Hospice and Palliative Care](#) Stephen R.
