The Ferris Wheel Co. Ferris Wheel Co, 1904 *Circles in the Sky* Richard Weingardt, 2009 In the summer of 1893 at the Columbian Exposition in Chicago, an engineering marvel was unveiled and immediately captured the world's attention. It was a towering web-like giant wheel standing upright and rotating high above the city. Several stories taller than any existing American building, the Ferris Wheel carried adventure-seeking passengers to the dizzying height of 264 feet and provided panoramic views never before possible. George W. G. Ferris Jr. and his wheel helped usher America eager to identify itself with ingenuity, entrepreneurialism, and innovation into the 20th century. Yet the very wheel that came to define George Ferris in the end consumed him, leaving him ruined. This book is the first full-length biography of George Ferris. He was a civil engineer, an inventor, and a pioneer for his development of structural steel in bridge building. *Circles in the Sky* chronicles the life of the man responsible for creating, designing, and building the Ferris Wheel, the only structure of its time to rival the Eiffel Tower. It is at the same time the story of the Ferris clan, one of the nation's oldest and most fascinating families. The London Eye, erected in 1999 to welcome the new millennium, the Star of Nanchang, and most recently the Singapore Flyer, have revived our love affair with Ferris wheels. *Circles in the Sky* will enchant anyone interested in engineering marvels, history, and the Ferris wheel, which reminds us that America was built by dreamers and innovators such as George W. G. Ferris Jr. About the Author: Richard G. Weingardt, P.E., Dist.M.ASCE, is a practicing structural engineer with nearly 50 years of experience. He is also a sought-after motivational speaker and an accomplished author of books and articles, including *Engineering Legends: Great American Civil Engineers* (ASCE Press, 2005) and regular columns in *Structural Engineer* and ASCE's *Journal of Leadership and Management in Engineering*.

Ferris Wheels Norman D. Anderson, 1992 June 21, 1893 dawned clear in Chicago. By mid afternoon, hundreds of invited guests and curious spectators crowded around a small platform on the Midway Plaisance at the World's Columbian Exposition. Promptly at 3:30, the official party took their places and following the speeches, George Washington Gale Ferris Jr. blew a small golden whistle. The giant observation wheel was officially open to all those who wanted a bird's eye view of the fair and the never-to-be-forgotten thrill of riding the Ferris Wheel. The miracle of engineering Ferris had built in less than six months was 264 feet tall, taller than any building existing at the time, and the 36 cars each held up to 60 passengers. Before the Exposition closed, nearly a million and a half people paid 50 cents for a twenty minute ride on The Eighth Wonder of the World. And since then, amusement wheels worldwide that carry people up over the top and down have been called Ferris.
