The First Of Supermarkets:

The First Book of Supermarkets, 1954 Describes the operation and history of supermarkets including where the groceries come from how they are purchased delivered and displayed and innovations in supermarkets *Information and Communications Technology and Operational Efficiency in Supermarkets in Nairobi* Josephat Mwebi, 2018-09-26 Thesis M A from the year 2013 in the subject Business economics Miscellaneous grade 87% 1st University of Nairobi Management Science course Operations Management language English abstract The aim of this research was to find out the role of various ICT applications in the improvement of operational efficiency for supermarkets in Nairobi It aimed to answer the questions of ICT applications that are adopted by supermarkets in Nairobi and the relationship between the level of adoption of these applications and operational efficiency that was attained A sample of 58 supermarkets was chosen from the list of 110 supermarkets to which structured questionnaires were issued by drop and pick method The forty two questionnaires were duly filled and returned This constitutes 72.4% response which according to Stacks 2011 was adequate for use in analysing and presenting findings for the identified research objectives The findings indicated that applications that were simple and cheap to install and implement such as CCTV cameras electronic point of sale systems and bar code readers were most prevalent while advanced and relatively expensive ICT applications such as ecommerce supply chain systems and enterprise resource systems were least used The size of supermarkets also determined ICT equipment that were used Coefficient of correlation of 0.52 was obtained from the regression analysis that measured the strength of the relationship between dependent and independent variables The relationship was direct meaning that supermarkets with largest extent of ICT application in their premises had the highest operational efficiency It was recommended that supermarket owners acquaint themselves with ICT applications that are available in the market and evaluate those that are suitable for their needs Supermarkets that had a wide array of application in their premises had high operational efficiency It is therefore necessary that they use all available ICT applications depending on their needs Given that some ICT applications were expensive to buy and implement it was suggested that developers make applications that are suitable for local needs with regard to supermarkets *Supermarkets and Agri-food Supply Chains* David Burch, Geoffrey Lawrence, 2007 This book analyses the gradual shift in the distribution of power in agri food supply chains away from the manufacturers of branded food products to the global supermarket chains such as Wal Mart and Tesco This transformation has had a profound effect on the food we eat together with the ways in which food is produced processed and marketed The authors assess the causes and consequences of this transformation and evaluate the impacts along the whole supply chain The book considers a variety of theoretical and cultural approaches to the analysis of change in the organization and management of the agri food supply chain and presents a series of studies focusing upon the effects of changes in Europe North America and less developed countries The impacts on farmers and workers and implications for the environment are also considered The contested

nature of these changes suggests a number of possible future scenarios for the global agri food system which are also analysed and evaluated This book will be of great interest to postgraduate and undergraduate students in business studies sociology politics geography and cultural studies Academic researchers and teachers and policy makers and researchers in business government and industry will also find much of interest
