Michael C. McKenna,Linda D. Labbo,Ronald D. Kieffer,David Reinking,2013-01-11 This Handbook provides a comprehensive and international representation of state of the art research theory and practice related to principal areas in which significant developments are occurring in the study of literacy and technology It offers a glimpse of the commonalities faced by literacy educators around the world together with specific challenges raised by unique circumstances Volume I of this Handbook endeavored to lay essential groundwork for the study of literacy and technology it retains an explanatory value that will not weaken over time Volume II differs considerably in conception It assumes for the most part a higher level of

expertise on the part of readers and the projects and applications described by the contributors are characterized by greater sophistication The scope of technology use is broader and the challenges that have emerged are in sharper focus A powerful feature of this volume is the addition of commentaries from experts across the field on the potential of technology in key dimensions of literacy The title of Volume II has changed slightly to reflect the inclusion of contributions on a broad geographic basis It is now a truly international Handbook with chapter authors from six countries and five continents The International Handbook of Literacy and Technology Volume II is organized in five sections The Role of Technology in the New Literacies Technology Applications with Specific Populations Literacy Software and the Internet Teacher Education and Professional Development and The Potential of Technology in Key Dimensions of Literacy The effects of technology on literate activity have been both sweeping and subtle marked by an increasing variety of changes that are difficult to evaluate and project Perhaps the only prediction that can be offered with certainty is that the impact of technology is irreversible Specific changes may come and go but literacy and technology seem inextricably linked This Handbook is dedicated to that linkage and to examining the intricacies that define it International Handbook of Literacy and Technology Volume II is an essential reference for researchers professionals and students in reading literacy education literacy and technology educational technology and related areas and will serve well as a text for upper level and graduate courses on these topics
