Computer Security John S. Potts, 2002 We live in a wired society with computers containing and passing around vital information on both personal and public matters. Keeping this data safe is of paramount concern to all. Yet not a day seems able to pass without some new threat to our computers. Unfortunately the march of technology has given us the benefits of computers and electronic tools while also opening us to unforeseen dangers. Identity theft, electronic spying and the like are now standard worries. In the effort to defend both personal privacy and crucial databases, computer security has become a key industry. A vast array of companies devoted to defending computers from hackers and viruses have cropped up. Research and academic institutions devote a considerable amount of time and effort to the study of information systems and computer security. Anyone with access to a computer needs to be aware of the developing trends and growth of computer security. To that end, this book presents a comprehensive and carefully selected bibliography of the literature most relevant to understanding computer security. Following the bibliography section, continued access is provided via author, title and subject indexes. With such a format, this book serves as an important guide and reference tool in the defence of our computerised culture.

Cumulated Index to the Books, 1999 **Legal report on the ecosystem approach to fisheries in Togo**

Nakamura, J.N., Amador, T., 2022-05-26 Legislating for an ecosystem approach to fisheries EAF is complex due to the holistic nature of EAF involving multiple factors that underpin the social, economic, environmental and institutional aspects of fisheries sustainability. These factors include ecosystems integration, risks, inter-sectoral collaboration, research, participatory processes, monitoring, control, surveillance and enforcement among others. To assess how an EAF is being implemented through national policy and legal frameworks, FAO developed a diagnostic tool for implementing an ecosystem approach to fisheries through national policy and legal frameworks. The present legal report on the EAF used the diagnostic tool to assess the alignment of selected policy and legal instruments of Togo with an EAF. This assessment analysed the extent to which 82 EAF legal requirements, which are considered the minimum standards in legislating for an EAF, are reflected in Togo's policies and legislation relevant to the fisheries sector of the country and other relevant sectors such as environment, wildlife, ecosystems and maritime affairs. Based on this preliminary diagnosis, gaps were identified in the assessed instruments and recommendations were made for improving the implementation of an EAF. This report was elaborated following a
