Exclusively available on IvyPanda

Nature is the influence of genetics or hereditary factors in determining the individual's behavior. In other words, it is how natural factors shape the behavior or personality of an individual. In most cases, nature determines the physical characteristics which in effect influence the behavior of an individual. Physical characteristics such as physical appearance, type of voice and sex which are determined by hereditary factors influences the way people behave.

Nurture on the other is the upbringing of an individual according to the environmental conditions. That is, the way individuals are socialized. Basically, nurture is the influence of environmental factors on an individual's behavior.

According to this paradigm, an individual's behavior can be conditioned depending on the way one would like it to be. Often, individuals' behaviors are conditioned by the socio-cultural environmental factors. It is because of socio-cultural environmental conditions that the differences in the behavior of individuals occur.

Nature determines individual traits that are hereditary. In other words, human characteristics are determined by genetic predispositions which are largely natural. Hereditary traits are normally being passed from the parents to the offspring. They include characteristics that determine sex and physical make up. According to natural behaviorists, it is the genes that will determine the physical trait an individual will have. These are encoded on the individuals DNA.

Therefore, behavioral traits such as sexual orientation, aggression, personality and intelligence are also encoded in the DNA. However, scientists believe that these characteristics are evolutionary. That is, they change over time depending on the physical environment adaptability. Evolutionary scientists argue that changes in genes are as a result of mutations which are caused by environmental factors. Thus, natural environment determines individual characteristics which are genetically encoded in the DNA.

Conversely, individuals possess traits that are not naturally determined. These are characteristics that are learnt rather than being born with. These are traits which largely

Gives students further practice in academic study skills. Students analyse characteristics of written and spoken academic texts, develop awareness of academic culture and learn to avoid plagiarism. From essay organisation taking notes, group discussion to writing references and paraphrasing texts. **Reading Ji Kang's Essays** David Chai, 2021-09-09. This is the first English language book on the philosophy of Ji Kang. Moreover, it offers the first systematic treatment of his philosophy, thus filling a significant gap in English language scholarship on early medieval Chinese literature and philosophy. David Chai brings to light Ji Kang's Neo Daoist heritage and explores the themes in his writings that were derived from classical Daoism, most notably the need for humanity to return to a more harmonious co-existence with Nature to further our own self-understanding. His analysis is unique in that it balances translation and annotation with exposing the creative philosophizing of Neo Daoism. Chai analyzes the entirety of Ji Kang's essays, exploring his philosophical reflections on music, aesthetics, ethics, self-cultivation, and fate. *Reading Ji Kang's Essays* will be of interest to scholars and students of Chinese philosophy and literature. It offers the first comprehensive philosophical examination of a heretofore neglected figure in Neo Daoism.
