Guns Illustrated, 2001 Ken Ramage, 2000 **Equipping James Bond** André Millard, 2018-11-15 James Bond's amazing gadgets reveal both enthusiasm about technology and fear of its potential ramifications. The popularity of the 007 franchise depends on a seductive formula of sex, violence, and snobbery. Much of its appeal too lies in its gadgets: slick, somewhat improbable technological devices that give everyone's favorite secret agent the edge over his adversaries. In **Equipping James Bond** André Millard chronicles a hundred-year history of espionage technology through the lens of Ian Fleming's infamous character and his ingenious spyware. Beginning with the creation of MI6, the British secret service, Millard traces the development of espionage technology from the advanced weaponry of the nineteenth century to the evolving threat of computer hacking and surveillance. Arguing that the gadgets in the books and films articulate the leading edge of technological awareness at the time, Millard describes how Bond goes from protecting 1950s England from criminal activity to saving a world threatened by nuclear bombs, poison gas, and attacks from space. As a modern and modernizing hero, Bond has to keep up with the times. His film franchise is committed to equipping both Bond and his adversaries with the latest technological gadgets. Simultaneously, Millard stresses the villains and threats that Bond faces embody contemporary fears about the downside of technological change. Taking a wide-ranging look at factual and fictional technology, Millard views the James Bond universe as evidence for popular perceptions of technological development as both inevitably progressive and apocalyptically threatening.

Guns Illustrated, 1991 Harold A. Murtz, 1990-08 **Shaken, Not Stirred!** Metin Tolan, Joachim Stolze, 2020-09-08 How do James Bond's X-ray glasses work, the ones he uses to see whether the lady at the roulette table has a pistol concealed in her underwear? Is it really possible to launch oneself into the air and catch up with a plane that is free-falling towards the earth? Or to shoot down a helicopter with a pistol? In this lively and informative book, Germany's boldest physics professor, Metin Tolan, analyses the stunts and gadgets of the 007 films and even answers the question of all questions: Why does Bond drink his vodka martini shaken, not stirred? So much entertaining science is a rare thing. Spiegel Online
