Physical Chemistry, a Guided Inquiry Richard Samuel Moog, James Nelson Spencer, John Joseph Farrell, 2004

Designed to encourage active and collaborative learning in the physical chemistry classroom this text is a collection of group activities ChemActivities that can accompany any physical chemistry text. These ChemActivities teach students how to think like scientists rather than simply memorizing important conclusions arrived at by great scientists of the past. Clearly labeled scientific Models appear throughout each ChemActivity in bulleted and illustrated formats. These explanations of scientific theories help students develop their conceptual understanding of the material. Critical Thinking Questions appear after each Model and ask students to explore ideas in a number of ways. Students might be required to explain a concept, draw a molecule, complete a table or write an explanation about a topic to another student.
