A wide ranging anthology of essays that examine the uses purposes and influence of religious language It is said that words are like people One can encounter them daily yet never come to know their true selves This volume examines what words are how they exist in religious phenomena Going beyond the common idea that language merely describes states of mind beliefs and intentions the book looks at words in their performative and material specificity The contributions in this volume examine and employ a number of linguistic and semiotic ideologies They develop the insight that our implicit assumptions about language guide the way we understand and experience religious phenomena They also explore the possibility that insights about the particular status of religious utterances may in turn influence the way we think about words in our language
