Cities, Politics, and Policy John P. Pelissero,2002-10-01 Just because Milwaukee isn't Manhattan doesn't mean that those urban centers face completely unique challenges Through effective comparative analysis of key issues in urban studies how city managers share power with mayors how spending policies affect economic development and how school politics impact education policy students can clearly see how scholars discern patterns and formulate conclusions to offer theoretical and practical insights from which all cities can benefit Pelissero brings together an impressive team of contributors to explore variation among cities through case studies and cross sectional analyses Each author synthesizes the field's seminal literature while explaining how urban leaders and their constituents grapple with everything from city council politics to conflict and cooperation among minority groups Authors identify both key trends and gaps in the scholarship and help set the research agenda for the years to come Lively case material will hook your students while the accessible presentation of empirical evidence make this reader the comprehensive and sophisticated text you demand

Custodians of Place Paul George Lewis,Max Neiman,2009 Custodians of Place provides a new theoretical framework that accounts for how different types of cities arrive at decisions about residential growth and economic development Lewis and Neiman surveyed officials in hundreds of California cities of all sizes and socioeconomic characteristics to account for differences in local development policies This book shows city governments at the center of the

action in shaping their destinies frequently acting as far sighted trustees of their communities They explain how city governments often can insulate themselves for the better from short term political pressures and craft policy that builds on past growth experiences and future vision Findings also include how conditions on the ground local commute times housing affordability composition of the local labor force play an important role in determining the approach a city takes toward growth and land use What types of cities tend to aggressively pursue industrial or retail firms What types of cities tend to favor housing over business development What motivates cities to try to slow residential growth Custodians of Place answers these and many other questions **Critical Pluralism, Democratic Performance, and Community Power** Paul Schumaker,1991 Who governs is a central question in political science Typically political scientists address this question by relying upon either empirical analysis which explains existing political practices or normative analysis which prescribes ideal political practices **The Threads of Public Policy: a Study in Policy Leadership** Robert Eyestone,1971
