Schmitz,2025-05-13 The view into the sky reveals fantastic pictures of the galaxies What do we know about the Universe Which story is reported by the space telescopes Today astronomers are able to watch a massive black hole in the center of our Milky Way What about this discovery for which the Nobel Prize was awarded in the year 2020 Black holes and the Big Bang are very mysterious If you wish to get an answer start the journey into this book The physical journey tells about the natural laws which create the galaxies and the stars The surprising question is Do we live in a cosmic black hole

The Universe Byron Preiss,2010-09-02 In this book we gather together the scientists the intellectuals and the artists to learn about and speculate upon the cosmos The world right now desperately needs both the physicist and the dreamer G d has blessed us with the most magnificent world imaginable We have barely made the first steps in seeing all the light in the darkness Perhaps it is the dreamer who will find out the nature of dark matter perhaps it is the scientist who will find solutions to needless hunger and mindless war For them both the bounty of the Earth and the cosmos is the currency of hope Humanity must use what it has been blessed with to survive Then as in Paul Simon s phrase we all might be dancing together with diamonds on the soles of our shoes They will be the diamonds of the stars and it will be a dance of peace New

Universe Theory with the Laws of Physics Bobby McGehee,2005 Big Bang Do you believe it I don t Being a career engineering physicist I always look for proof For 50 years I have tried to prove the BB to myself I have reviewed Slipher s red shift observation reinterpreted it and corrected Hubble s declaration the universe is not expanding and exploding to its death instead it is growing with vim and vigor Red shift defines velocity not acceleration or deceleration So I developed the New Universe Theory which is believable because it complies with known facts and the Laws of Physics *Astronomical!*
