**The Logic of Faith** Elizabeth Mattis Namgyel, 2018-02-27 A popular American Buddhist teacher explores the creative relationship between faith and doubt knowing and not knowing and shows how an awakened life results from living from the place in between Faith is a thorny subject these days Its negative expressions cause many to dismiss it out of hand but Elizabeth Mattis Namgyel urges us to reconsider for faith is really nothing but our natural proclivity to find certainty in a world where certainty is hard to come by And if we look carefully we ll discover that the faith impulse isn t separate from reason at all faith and logic in fact work together in a playful and dynamic relationship that reveals the profoundest kind of truth a truth beyond the limits of is and is not Using the traditional Buddhist teachings on dependent arising Elizabeth leads us on an experiential journey to discover the essential interdependence of everything and through that thrilling discovery to open ourselves to the whole wonderful range of human experience

**The Logic of Incarnation** Neal DeRoo, Brian Lightbody, 2009-01-01 With his Logic of Incarnation James K A Smith has provided a compelling critique of the universalizing tendencies in some strands of postmodern philosophy of religion A truly postmodern account of religion must take seriously the preference for particularity first evidenced in the Christian account of the incarnation of God Moving beyond the urge to universalize which characterizes modern thought Smith argues that it is only by taking seriously particular differences historical religious and doctrinal that we can be authentically religious and authentically postmodern Smith remains hugely influential in both academic discourse and church movements This book is the first organized attempt to bring both of these aspects of Smith s work into conversation with each other and with him With articles from an internationally respected group of philosophers theologians pastors and laypeople the entire range of Smith s considerable influence is represented here Discussing questions of embodiment eschatology inter religious dialogue dogma and difference this book opens all the most relevant issues in postmodern religious life to a unique and penetrating critique

**Logical Faith** Joseph P. Provenzano, Richard W. Kropf, 2007-07-30 Science has failed to develop ethical guidelines or a path to personal fulfillment as previously expected Religious differences continue to be a source of friction threatening world peace But now a new more encompassing vision of reality a vision that offers new ways to address these problems is emerging This evolutionary view presented by authors Joseph P Provenzano and Richard W Kropf builds on the findings of modern science but also touches on personal fulfillment and spiritual values In our worldwide computerized information age we have seen an unprecedented clash of moral values scientific pursuits religions spiritual movements and cultures Provenzano and Kropf explain how it is possible to have a religious faith consistent with the understanding of matter and energy as studied by contemporary science logical faith Logical Faith Introducing a Scientific View of Spirituality and Religion presents a clear down to earth formulation of an emerging vision Provenzano and Kropf show how their viewpoint can be used as a bridge between science and spirituality and as a base to develop a new path to tolerance among the world s great religions and spiritual movements

**Paul Ricoeur, Philosophical Hermeneutics, and the Question of Revelation** Christina M. Gschwandtner,2024-01-08

The topic of revelation is fundamental to any account of religious experience playing a special role in the Judeo Christian tradition where the texts of Scripture are regarded as revealed Yet any reflection on the revealed status of a given message or text requires interpretation Paul Ricoeur one of the most important hermeneutic philosophers of the twentieth century provides crucial insights on how such interpretation might proceed and what it might mean for texts to be revealed Edited by Christina M. Gschwandtner Paul Ricoeur Philosophical Hermeneutics and the Question of Revelation brings together major scholars of Ricoeur's work on the topic of revelation showing both the role it already plays in his work and how his thinking might be taken further Several contributors trace the development of his thought in regard to the concept of revelation Others discuss the revelatory dimensions of Ricoeur's hermeneutics of the self especially for such issues as identity trauma and forgiveness Several contributions also place his work in conversation with that of other seminal thinkers on the topic of revelation such as Karl Barth and Paul Tillich **The Logic of Promise in Moltmann's Theology** Christopher Morse,1979 Based on the author's thesis Includes bibliographical references and indexes **The Conservator**,1892 **The Scientific Bases of Faith** Joseph John Murphy,1873 Seeing and Being John White Chadwick,1893 Is it So?
