Diversity, Conformity, and Conscience in Contemporary America Bradley C. S. Watson, 2019-02-19 America is a nation that celebrates diversity and freedom of conscience Yet as Alexis de Tocqueville observed democratic times often demand conformity Nowadays conformity might be enforced in the name of diversity itself and go so far as to infringe on the rights of conscience expression association and religious freedom Americans have recently been confronted by this paradox in various ways from federal health care mandates to campus speech codes to consumer boycotts to public intimidation to vexatious litigation to private corporations dismissing employees for expressing certain political views In this book Bradley C S Watson brings together leading thinkers from a variety of disciplines to examine the manner and extent to which conformity is demanded by contemporary American law and social practice Contributors also consider the long term results of such demands for conformity for the health and even survival of a constitutional republic

Strategic Entrepreneurial Finance Darek Klonowski, 2014-11-27 Entrepreneurial finance is a discipline that studies financial resource mobilization resource allocation risk moderation optimization in financial contracting value creation and value monetization within the context of entrepreneurship However without proper strategic consideration the discipline is incomplete This book examines how the activity of entrepreneurial finance can be enhanced via a concentration on value creation and through improved strategic decision making The most unique feature of the book is its focus on value creation For entrepreneurs value creation

is not a one off activity but rather a continuous cycle of incremental improvements across a wide range of business activities Entrepreneurial value creation is described in four comprehensive stages value creation value measurement value enhancement and value realization referred to as the C MER model This book focuses on what creates value rather than merely presenting value creation in a straight accounting framework At the same time deliberate and tactical planning and implementation ensure that the firm does not ignore the components necessary for it to survive and flourish Vigorous strategic deliberations maximize the entrepreneurial firm s chances of making the right business decisions for the future enable the firm to manage its available financial and non financial resources in the most optimal manner ensure that the necessary capital is secured to progress the development of the firm to its desired development level and build value While financial considerations are important the field of strategic entrepreneurial finance represents a fusion of three disciplines strategic management financial management and entrepreneurship This orientation represents a natural evolution of scholarship to combine specific domains and paradigms of naturally connected business disciplines and reflects the need to simultaneously examine business topics from different perspectives which may better encapsulate actual entrepreneurial practices

Entrepreneurship in Family Business Henry X Shi,2014-02-20 This book presents an excellent analysis of how a family business is different from other forms of organization and especially its peculiarities in relation to entrepreneurship Focusing on small and medium sized second generation Chinese family businesses this book provides an in depth analysis on the relationship between the firms family attributes or familiness as conceptualized in this book and entrepreneurial processes which leads to different outcomes Eight cases from China are presented in this book and a dual level approach is proposed for research on entrepreneurship in family businesses emphasising both firm processes and the role of individual owner managers Readers will also find several useful policy and practice oriented perspectives in this book

Poultry Genetics, Breeding and Biotechnology W.M. Muir,S.E. Aggrey,2003 Annotation In this comprehensive research book issues associated with poultry breeding are addressed by examining quantitative and molecular genetics and the uses of transgenic technology The important area of disease resistance and transmission is also covered in a special section looking at the genetics of disease resistance This book represents the first complete integration of our current knowledge of biotechnology and quantitative and molecular genetics as applied to poultry breeding
