The Four Jameses:

James: An Introduction and Study Guide Margaret Aymer, 2017-01-12 In this guide Margaret Aymer introduces the letter of James countering arguments that it is of limited theological value and significance for early Christianity Aymer focuses on James theology of God's divine singularity and immutability and of God's relationship to the community as father and benefactor These are theological foundations for its emphasis on community actions of belief humility and mutual care Aymer introduces and examines the letter's stand against empire not least in regard to wealth Divine power is envisioned as an alternative power to that of the Romans though in some respects it can seem equally brutal Aymer concludes by focusing on those addressed by James's homily the exiles in diaspora Engaging the psychology of migration she unpacks the migrant strategy underlying James's call to living unstained Finally Aymer encourages student to ask what it might mean now for twenty first century people to take seriously a separatist migrant discourse not only as an interesting ancient writing but as a scripture a lens through which its readers can glimpse the possibilities for how lives are to be lived and how contemporary worlds can be interpreted and engaged [A concise harmony of the four Gospels](#), 1888

Social and Environmental Impacts of the James Bay Hydroelectric Project James F. Hornig, 1999 Planning and construction of the James Bay Hydroelectric project began in the early 1970s when the effect of such projects on the physical and social environment was seldom considered As the project matured however its unique and diverse environmental impacts came under intense scrutiny on both sides of the border The first mega scale hydro project to be built in the sub Arctic capable of generating as much electricity as fifteen nuclear power plants its impact includes disruption of vast areas in an extremely fragile ecosystem as well as displacement of native peoples and the introduction of dangerous levels of mercury into their food supply The debate over these complex environmental issues has been further complicated by political issues stemming from the importance of the project to the economic development of Quebec and the sale of at least ten percent of the electricity generated to the United States The contributors examine core issues of the controversy both in relation to James Bay and to other large hydroelectric projects such as the Aswan dam in Egypt and the Three Gorges dam in China Providing insights from an unusual variety of disciplines the authors offer important considerations that must be taken into account as Quebec assesses additional phases of hydroelectric development of the watershed east of Hudson Bay Contributors include Raymond B Coppinger Hampshire College Bill Dale Roebuck Dartmouth Medical School Will Ryan Hampshire College Adrian Tanner Memorial University Stanley L Warner Hampshire College Kessler E Woodward University of Alaska and Oran R Young Dartmouth College James F Hornig is professor emeritus of chemistry and environmental studies Dartmouth College
