**Indian Journal of Psychiatry** ,1993      *The Psychology of Gender* Vicki S. Helgeson,2005 Unlike other gender books this one focuses equally on both men and women drawing from the empirical research and conceptual discussions surrounding gender in the areas of psychology sociology anthropology medicine and public health It reviews the research from multiple perspectives but emphasizes the implications of social roles status and gender related traits particularly for relationships and health areas that are central to readers lives and that have a great impact on their day to day functioning For individuals interested in the psychology of gender gender roles and women      Behavior Therapy in Terminal Care Harry J. Sobel,1981      **Principles of Ambulatory Medicine**

Nicholas H. Fiebach, Lee Randol Barker, John Russell Burton, Philip D. Zieve, 2007 Updated for its Seventh Edition Principles of Ambulatory Medicine is the definitive reference for all clinicians caring for adult ambulatory patients. It provides in depth coverage of the evaluation, management and long term course of all clinical problems addressed in the outpatient setting. A major focus is on preventive care grounded in excellent patient/physician communication. This edition features increased coverage of preventive care particularly the impact of genetic testing as a disease predictor. For easy reference the book is organized by body system and each chapter begins with an outline of key topics. References to randomized controlled clinical trials, meta analyses and consensus based recommendations are boldfaced. *Pharmacotherapy Handbook, Eighth Edition* Barbara Wells, 2012 Essential drug data in a concise carry anywhere reference. Pharmacotherapy Handbook 8e provides practitioners and students with the critical information necessary to support drug therapy decision making for more than 140 diseases and disorders. Featuring a convenient alphabetized presentation this handy guide utilizes tables, texts, figures and treatment algorithms to make the information readily accessible and easily understood. The consistent chapter organization includes: Disease state definition, Review of relevant pathophysiology, Clinical presentation, Diagnosis, Desired outcome, Treatment, Monitoring. The Treatment section usually includes nonpharmacologic therapy, drug selection, guidelines, dosing, recommendations, adverse effects, pharmacokinetic considerations and important drug interactions. *Cognitive Behaviour Therapy for People with Cancer* Stirling Moorey, Steven Greer, 2002 Cognitive Behaviour Therapy (CBT) has established itself as the psychological treatment of choice for many conditions. It offers a brief, convincing, common sense approach to the emotional problems faced by people with cancer and there is considerable evidence for its effectiveness. Since the first edition of this book in 1989 published as Psychological Therapy for Patients with Cancer, there have been many developments in cognitive therapy and psycho-oncology which have been incorporated in the new edition. The current evidence for the effect of psychological state on survival and the efficacy of CBT in cancer is reviewed. Using a cognitive behavioural model to understand reactions to cancer, the authors present cognitive behavioural, emotional and interpersonal interventions to help people adjust to the threat to their life and their view of themselves. Case examples illustrate how these techniques are used to reduce anxiety and depression, induce a fighting spirit, teach effective coping skills and develop open communication between patients and their partners. Mental health professionals working in oncology and health care professionals interested in psychological management will find this a useful source for psychological techniques that can be applied in a busy clinical setting.
