[Neoliberalism 2.0: Regulating and Financing Globalizing Markets](#) L. Nijs,2016-01-26 In today's increasingly globalized environment many economic fundamentals need to be

reconsidered in order to regain stability in the global marketplace One such consideration is the failing dynamics of the international tax infrastructure Neoliberalism 2.0 brings a 21st century assessment of the Pigovian taxes considering a completely new calibration of the international tax systems inspired by the historically developed Pigovian tax model The book considers the impact neoliberalism had and will have on regulatory infrastructure democracy in an era of globalization and reduced legitimacy of the national state The Pigovian model brings home the often forgotten relationship between taxation as a part of the regulatory sphere macro economics and the political philosophical context in which law and economics emerge The model also takes into account the phenomena of globalization and financialization and is tested using the financial sector as an example This book addresses the many challenges a Pigovian shift would imply for the sovereign and its national economies Neoliberalism 2.0 demonstrates the ability to design a paradigm changing alternative to the current tax infrastructure while taking into account a low economic growth environment of the future the implications of globalization and the changing relationship between citizens and their state

**Journal of Economic Literature** ,2014 *The Inner Lives of Markets* Ray Fisman,Tim Sullivan,2016-06-07 America s economic revolution isn t just driven by technology It s about markets The past twenty five years have witnessed a remarkable shift in how we get the stuff we want If you ve ever owned a business rented an apartment or shopped online you ve had a front row seat for this revolution in progress Breakthrough companies like Amazon and Uber have disrupted the old ways and made the economy work better all thanks to technology At least that s how the story of the modern economy is

usually told But in this lucid wry book Ray Fisman and Tim Sullivan show that the revolution is bigger than tech it is really a story about the transformation of markets From the auction theories that power Google's ad sales algorithms to the models that online retailers use to prevent internet fraud even the most high tech modern businesses are empowered by theory first envisioned by economists And we're all participants in this revolution Every time you book a room on Airbnb hire a car on Lyft or click on an ad you too are reshaping our social institutions and our lives The Inner Lives of Markets is necessary reading for the modern world it reveals the blueprint for how we work live and shop and offers wisdom for how to do it better

[The effect of Black Economic Empowerment \(BEE\) on racial inequality in South Africa](#) Korbinian Stinglhamer,2017-10-11 Seminar paper from the year 2016 in the subject Economics

Case Scenarios grade 1 0 University of Wisconsin Madison Economics course Economics 477 Economic Development of Africa language English abstract This paper investigates the Black Economic Empowerment BEE program in South Africa and its economic justification by analyzing the trends in both intra and interracial inequality since the implementation of BEE Even though inequality is driven by many different factors this paper attempts to analyze whether BEE was able to effectively reduce inequality in the way that it was intended My findings suggest that BEE might have helped to reduce inequality between different races but that it increased inequality among black people During Apartheid black people were excluded from major parts of South Africa's economy This resulted in an unequal income distribution in South Africa Even after Apartheid ended in 1994 income was distributed unequally between races In order to reduce this inequality and equalize opportunities between the different races in South Africa the government implemented an affirmative action program called Black Economic Empowerment BEE in 2003 In this case and in the following sections the word black defines a racial group including Africans coloreds and Indians and can thus be used as synonym for non whites BEE introduced a scorecard which rates companies based on their economic inclusion of black people If the respective company receives a low rating on the

scorecard there will likely be a negative effect on their profit compared to a company with a high rating. The basic critique of BEE is that its main beneficiary is a small elite. Studies about the actual effects of BEE are rare as data on this topic is limited.

**Transport** Susan Hanson, Mei-po Kwan, 2008 This series of articles charts the development of thinking about space, place and transport. Divided into four parts, the articles cover fundamental concepts, individual behaviour in urban spatial context, inter-regional transport and policy issues. Taken together, the articles highlight the role that a geographic perspective has played in transport studies, raise questions about transport policy and point to additional questions worthy of research.
