These studies are based on the idea that the genetic code is simple, all of the data for the proteins (the genetic code) is encoded using the information in a single source. But they have been shown to be incorrect because the data is not encoded in a single source but is encoded in multiple sources. The data is encoded in the code of the genetic code and the information is encoded in the code of the genetic code. The data is encoded in the code of the genetic code and the information is encoded in the code of the genetic code.
