Spaces for Diplomacy Tomáš Černušák,Jiří Hrbek,Štěpán Vácha,2025-10-01

For the majority of Emperor Rudolf II's rule 1576-1612 Prague was the city of his permanent residence The ruler's presence as well as the presence of his court attracted diplomats and diplomatic actors They included ambassadors permanently representing leading European rulers smaller or larger foreign delegations coming to the emperor with specific temporary tasks numerous agents representing smaller states or interests of various individuals Their activities were connected to a certain space which can be understood in two senses as a topographically defined place and as a social space formed or influenced by people acting on the other hand The book uses various examples of diplomatic actors in Prague to explore interesting questions Which places in Prague could be considered the key ones from the diplomatic actors point of view How did the main aims of the diplomats that is negotiation information gathering and representation manifest themselves in various places How did the diplomatic actors perceive the space of the residential city Did the diplomatic actors attempt to somehow modify delimit or transform their spaces themselves

[Education for the Professions in Times of Change](#)
Linda Clarke, 2020-12-02. The eminent Harvard educationalist Howard Garner writes a preface to the Place Model within his Good Project Blog, which provides a preface to this timely book. 'Professional' is a slippery term open to willful abuse, misuse and misunderstanding, as evidenced by the ways in which this chameleon term can be used as both a compliment and an insult. In this book, academics from a range of professional fields deconstruct professional and reimagine professionals in an age of rapid change where professionals are both increasingly in demand and frequently under threat. Several papers deploy the lens of Clarke's Place Model to examine professions including teaching, midwifery, social work, journalism and optometry. Some papers are empirical and some are based around using the Place Model as a thought experiment. All turn a critical eye on professionals and all find them to be like all humans: neither devils nor divines. Maya Angelou, but at their best, a combination of two indispensable characteristics: trustworthiness and expertise.

[Assessing and Correcting Reading and Writing Difficulties](#) Thomas G. Gunning, 2002. This text provides numerous examples and thorough coverage of procedures for assessing and instructing struggling readers of all ages. In keeping with current theory, the text emphasizes prevention and early intervention. It is based on the premise that student performance is variable and that assessment and instruction are planned and modified to meet the varied needs and levels of students. Gunning does not subscribe to a medical model that emphasizes deficiencies but rather focuses on what students can do. This text calls for inclusion, not exclusion, but recognizes that struggling learners need expert, carefully planned assessment and instruction. Assessment coverage includes a grounding in basic concepts of tests and measurement. While formal standardized measures are described, emphasis is placed upon informal but highly regarded techniques such as the informal reading inventory, miscue analysis, running records, observation, think alouds, holistic scoring of writing, and portfolio assessment. In addition to chapters devoted specifically to assessment, ways to connect assessment and instruction are mentioned throughout the text. Coverage of instructional techniques is thorough and practical. Nine chapters are devoted to instructional techniques.

[Autoantibodies Research Progress](#) Quentin

P. Dubois,2008 An autoantibody is an antibody a type of protein manufactured by the immune system that is directed against one or more of the individual's own proteins Many autoimmune diseases in humans most notably lupus erythematosus are caused by such autoantibodies This book presents the latest research from around the world

New Directions in Geriatric Medicine Lee Ann Lindquist,2016-04-09 This book is designed to present the clinical geriatric trends within general internal medicine and family practice which practitioners often encounter in caring for their older adult patients Chapters focus on increasingly difficult clinical decisions that practitioners have to make in caring for older adults who often experience medical complications due to memory loss physical disability and multiple chronic conditions Written by experts in geriatric medicine each of these chapters start with the most up to date clinical geriatric research and provide specific examples or case studies on how to use this information to address the clinical needs of older adult patients In addition there is a set of concise take home points for each chapter that are easy to commit to memory and implement in clinical care of aging patients As the only book to focus on current trends in geriatric research and evidence based eldercare practice Clinical Trends in Geriatric Medicine is of great value to internists family practitioners geriatricians nurses and physician assistants who care for older adults
