**Production Management and Business Development** Bohuslava Mihalčová, Petra Szaryszová, Lenka Štofová, Michal Pruzinský, Barbora Gontkovičová, 2018-12-07 Trends in economic development rely on increasing human knowledge which stimulate the development of new sophisticated technologies. With their utilization production is raised and the intent is to decrease natural resources consumption and protect and save our life environment as much as we can. At the same time increasing pressure is observed both from competition and customers. The way to be competitive is by improving manufacturing and services offered to the customer. These are the major challenges of contemporary enterprises. Organizations are improving their activities and management processes. This is necessary to manage the seemingly intensifying competitive markets successfully. Enterprises apply business optimizing solutions to meet new challenges and conditions. This way ensuring effective development for long term competitiveness in a global environment. This is necessary for the implementation of qualitative changes in the industrial policy. Process Control and Production Management MTS 2018 is a collection of research papers from an international authorship. The authors present case studies and empirical research which illustrates the progressive trends in business process management and the drive to increase enterprise sustainability development.

illustrative case studies and investigative techniques. Contributors are the foremost authorities in such fields as fire investigation, industrial accidents, product liability, traffic accidents, civil engineering, transportation disasters and environmental systems failures, demonstrating the diverse spectrum of forensic experience. The book outlines the nuts and bolts aspects of forensic engineering as well as examines specific details for improving investigative procedures and analytical techniques. Forensic Engineering also describes methods in litigation and alternative dispute resolution such as arbitration, mediation, mini trials and more. Richly illustrated with case studies from various fields, each chapter includes guidelines, techniques, methods and tools for accident investigation and analysis. The text includes vital information on using forensic photogrammetry, planning and writing reports, serving as an expert witness in traditional litigation and resolving disputes. Providing proven formulas and thought provoking concepts, Forensic Engineering enables forensic experts in all engineering fields, design and construction professionals, attorneys, product manufacturers, insurance professionals and engineering and law students to maximize their investigative skills and litigation abilities.

**Guidebook for Air Cargo Facility Planning and Development** Mike Maynard, 2015. The guidebook presents a broad discussion of the various issues that must be addressed in planning air cargo facilities. It describes tools and techniques for sizing facilities including data and updated metrics necessary to forecast future facility requirements as a function of changing market and economic conditions. The procedures offered support airport operators in crafting effective business plans and development decisions that meet the industry's current and future technological, operational and security challenges in a cost effective, efficient and environmentally sensitive manner.
