

Documentary Research Strategy to Research Canada

Documentary Research: Ethnographic ethnography	1. Research aims Documentary Research aims to explore and understand the experiences of individuals and groups in a particular social context. This is achieved through the collection and analysis of documents, which are defined as any written or recorded material that provides information about a particular topic or issue. This can include a wide range of materials, from official records and government documents to personal letters and diaries. The aim of documentary research is to use these materials to gain a deeper understanding of the social and cultural context in which they were produced and to explore the ways in which they have been used and interpreted over time. 2. Research design Documentary research is a qualitative research method that involves the collection and analysis of documents. The design of a documentary research project will depend on the research aims and the types of documents that are available. It is important to consider the scope and depth of the research, the types of documents that will be collected, and the methods that will be used to analyze the data. It is also important to consider the ethical implications of the research, particularly in relation to the collection and use of personal documents. 3. Data collection The collection of documents for documentary research can be a challenging task. It is important to identify the types of documents that are relevant to the research and to develop a strategy for locating and collecting them. This may involve searching through archives, libraries, and other repositories, as well as contacting individuals and organizations that may have relevant documents. It is also important to consider the legal and ethical implications of the collection and use of documents, particularly in relation to the collection of personal documents. 4. Data analysis The analysis of documents for documentary research involves a range of methods, including content analysis, discourse analysis, and narrative analysis. These methods involve the identification and interpretation of the themes, patterns, and meanings that are present in the documents. It is important to consider the context in which the documents were produced and to explore the ways in which they have been used and interpreted over time. It is also important to consider the ethical implications of the analysis, particularly in relation to the collection and use of personal documents. 5. Conclusion Documentary research is a valuable method for exploring and understanding the experiences of individuals and groups in a particular social context. It involves the collection and analysis of documents, which can provide a wealth of information about a particular topic or issue. It is important to consider the scope and depth of the research, the types of documents that will be collected, and the methods that will be used to analyze the data. It is also important to consider the ethical implications of the research, particularly in relation to the collection and use of personal documents.
