**The Swiss Labyrinth** Jan-Erik Lane,2001      **Special Issue on the Swiss Labyrinth** ,2001      *Comparative Federalism and Intergovernmental Agreements* Jeffrey Parker,2014-08-27 Intergovernmental agreements are an important instrument in federal systems establishing new social programs regulating agricultural practices and even changing constitutions Despite their importance there have only been limited attempts to understand agreements in a comparative context or to provide a theoretical framework for their study This book addresses both of these deficiencies by comparing the use of agreements in six federations Australia Canada Germany South Africa Switzerland and the United States and considering why certain federations form more agreements than others Parker analyzes the data using an institutional framework that considers the effects of seven variables including the constitutional division of powers the system of intergovernmental transfers the size of the welfare state and the nature of governing institutions In addition the study provides the first ever comparative database of national intergovernmental agreements a new resource for future research This book will be of interest to students and scholars of Political Science Federalism Government Political Institutions Political Theory and Comparative Politics      *The Domestic Politics of Foreign Aid* Erik Lundsgaarde,2013 This book explains the choices that states make concerning the volume of development aid they provide and what types of priorities are supported with this assistance The core argument of the book is that aid choices are a product of domestic politics in donor countries which involve a variety of actors that differ in character across the donor community      **Comparative Biomedical Policy** Ivar A. Bleiklie,Malcolm L. Goggin,Christine Rothmayr,2004-08-02 This book presents a comparative study examining assisted reproductive technology policies in North America and Europe Based on original and detailed research this up to date volume establishes a knowledge base for understanding policy debates on topics such as embryonic stem cell research and therapeutic cloning      *The Radical Right in Switzerland* Damir Skenderovic,2009-09-01 There has been a tendency amongst scholars to view Switzerland as a unique case and comparative scholarship on the radical right has therefore shown little interest in the country Yet as the author convincingly argues there is little justification for maintaining the notion of Swiss exceptionalism and excluding the Swiss radical right from cross national research His book presents the first comprehensive study of the development of the radical right in Switzerland since the end of the Second World War and therefore fills a significant gap in our knowledge It examines the role that parties and political entrepreneurs of the populist right intellectuals and publications of the New Right as well as propagandists and militant groups of the extreme right assume in Swiss politics and society The author shows that post war Switzerland has had an electorally and discursively important radical right since the 1960s that has exhibited continuity and persistence in its organizations and activities Recently this has resulted in the consolidation of a diverse Swiss radical right that is now established at various levels within the political and public arena      *The Politics of Biotechnology in North America and Europe* Éric Montpetit,Frédéric

Varone, Christine Rothmayr, 2006-12-19 Biotechnology is one of the most important new issues to emerge in the knowledge economy The Politics of Biotechnology in North America and Europe provides analysts with a perspective on policy making in scientifically advanced countries that integrate the insights of several approaches and that display a particular sensitivity to the complexity of policy making conjectures This perspective allows going beyond the simplistic understandings of biotechnology policy currently prevailing This volume provides a rigorous analysis and detailed information on biotechnology policy in nine countries The essays included here present the results of in depth empirical research in the area of biomedicine and agro food biotechnology The book is therefore not only of interest to policy makers and policy analysts but also to anyone with an interest in biotechnology
