Patterns of Work in Global Value Chains Stephanie Barrientos,2019-05-23 This book focuses on the changing gender patterns of work in a global retail environment associated with the rise of contemporary retail and global sourcing This has affected the working lives of hundreds of millions of workers in high middle and low income countries The growth of contemporary retail has been driven by the commercialised production of many goods previously produced unpaid by women within the home Sourcing is now largely undertaken through global value chains in low or middle income economies using a cheap feminised labour force to produce low price goods As women have been drawn into the labour force households are increasingly dependent on the purchase of food and consumer goods blurring the boundaries between paid and unpaid work This book examines how gendered patterns of work have changed and explores the extent to which global retail opens up new channels to leverage more gender equitable gains in sourcing countries Report of the State Board of Equalization for ...
