Physics Gadgets and Gizmos Grades 9 12 encourage your high school students to explore a variety of phenomena involved
with pressure and force thermodynamics energy light and color resonance buoyancy two dimensional motion angular
momentum magnetism and electromagnetic induction The authors say there are three good reasons to buy this book 1 To
improve your students thinking skills and problem solving abilities 2 To acquire easy to perform experiments that engage
students in the topic 3 To make your physics lessons waaaaay more cool The phenomenon based learning PBL approach used
by the authors two Finnish teachers and a U S professor is as educational as the experiments are attention grabbing Instead
of putting the theory before the application PBL encourages students to first experience how the gadgets work and then grow
curious enough to find out why Students engage in the activities not as a task to be completed but as exploration and
discovery The idea is to help your students go beyond simply memorizing physics facts Using Physics Gadgets and Gizmos
can help them learn broader concepts useful critical thinking skills and science and engineering practices as defined by the
