

# WHY 3 BAND IS BETTER

The iProtect 1216 is a professional RF detector created for discovering all types of RF eavesdropping devices, including analog and digital, as well as those that transmit information over mobile networks and using wireless standards.

The frequency range of the 1216 has been split into 3 parts, each displayed by a separate bargraph: **VHF/UHF 50-700 MHz**; **Mobile and wireless 700 MHz – 3 GHz**; and **Microwave and wireless 3-12 GHz**. The separate indication allows the operator to better understand what type of signal is detected, to detect several signals at the same time and to sustain the ability of detection near the sources of interference.

Architectures and Synthesizers for Ultra-low Power Fast Frequency-Hopping WSN Radios Emanuele Lopelli, Johan van der Tang, Arthur H.M. van Roermund, 2010-11-19 Wireless sensor networks have the potential to become the third wireless revolution after wireless voice networks in the 80s and wireless data networks in the late 90s. Unfortunately, radio power consumption is still a major bottleneck to the wide adoption of this technology. Different directions have been explored to minimize the radio consumption, but the major drawback of the proposed solutions is a reduced wireless link robustness. The primary goal of Architectures and Synthesizers for Ultra-low Power Fast Frequency Hopping WSN Radios is to discuss in detail existing and new architectural and circuit level solutions for ultra-low power robust uni-directional and bi-directional radio links. Architectures and Synthesizers for Ultra-low Power Fast Frequency Hopping WSN Radios guides the reader through the many system, circuit and technology trade-offs he will be facing in the design of communication systems for wireless sensor networks. Finally, this book through different examples realized in both advanced CMOS and bipolar technologies, opens a new path in the radio design showing how radio link robustness can be guaranteed by techniques that were previously exclusively used in radio systems for middle or high end applications like Bluetooth and military communications while still minimizing the overall system power consumption.

Mobile Handset Design Sajal Kumar Das, 2013-05-29 The evolution of mobile communication standards presents numerous challenges in mobile handset design. Designers must continue to turn out handsets that maintain high device performance and air-interface compatibility while at the same time shrink power consumption, form factors and costs. Mobile Handset Design is uniquely written to equip professionals and students with a complete understanding of how a mobile phone works and teaches the skills to design the latest mobile handsets. Das walks readers through mobile phone operating principles, system infrastructure, TDMA, FDMA, CDMA, OFDMA, techniques, hardware anatomy, software and protocols, and internal modules, components and circuits. He presents all problems associated with mobile wireless channels and recommends corresponding design solutions to overcome those issues. Mobile RF, front end, digital baseband design techniques and associated trade-offs are also covered. Das also discusses the productization aspects and reviews new research developments for different mobile phone systems over generations. Teaches basic working principles of legacy and 4G mobile systems. Vividly illustrates and explains all key components and the anatomy of mobile phones. Explains all hardware and software blocks from principle to practice to product. Discusses key design attributes such as low power consumption and slim form factors. Moves through all topics in a systematic fashion for easy comprehension. Presentation files with lecture notes available for instructor use. This book is essential for practicing software, hardware and RF design engineers and product managers working to create innovative competitive handsets. Mobile Handset Design is also ideal for fresh graduates or experienced engineers who are new to the mobile industry and is well suited for industry veterans as a handy reference.
