## **The Future Of Life:**

*The Future of Values* Binde,2004 This volume brings together about 50 scientists and researchers from the four corners of the world to redefine and anticipate tomorrow s values and reflect on the direction these values may lead humanity Publisher s description

*The Future of God in the Global Village* Thomas R. Mcfaul,2011-10 In the long trek of human history the adage that there will never be peace among the nations until there is peace among the religions has never been truer The growing trend toward spiritually inspired violence throughout the emerging global village of the twenty first century has taken a terrible toll on the lives of thousands of innocent victims The primary purpose of this book is to address this issue head on by examining the role that the earth s diverse faith communities can play in stopping the needless hatreds and hostilities that all too often arise from the search for spiritual fulfillment At this stage of human evolution nothing is more urgent

*The Future of Nuclear Power* John N Lillington,2004-10-27 During the last century nuclear power has been established as a reliable source of energy in the major industrialised countries It has recently enjoyed a revival in attention and research due to the environmental concerns surrounding current conventional energy sources Issues of regulation and safety are at the forefront of all discussions involving nuclear power and will govern its place in the future The Future of Nuclear Power takes a technical and comprehensive look at the current and future status of nuclear power throughout the world The 17 chapters are divided into two main sections a review of all current generation plants and concepts for new advanced reactor design and safety The broad ranging topics covered by this publication coupled with the current revival of interest in nuclear energy make it a timely reference for all nuclear scientists Reviews the issues surrounding the future operation of existing commercial nuclear plants Several chapters dedicated to the extensive research programs in place concerning safe and reliable operation Compares nuclear and non nuclear options for energy needs in the future evaluating the benefits and risks of both

**The Future of Equality** Shlomi Segall,2025-05-15 Philosophers have been preoccupied with the future from time immemorial But for egalitarians the future of humanity constitutes a relatively new challenge The premise of this book is that a complaint based ideal of egalitarianism faces problems when applied to the future For one thing if we suppose that future people are destined to fare better than us say in terms of overall wellbeing then allowing humanity to flourish would then represent a net increase in terms of egalitarian complaints With respect to equality at least it would be better to refrain from bringing new life into being That seems absurd This is the Anti Natalist objection to egalitarianism Second any policy aimed at reducing future inequalities and indeed any population policy at large will in all likelihood affect the identity of those who will be born This familiar Non Identity problem poses unique problems for egalitarianism especially ones of the complaint model Arguably a person cannot have a complaint about being worse off than another when the only other alternative distribution is one in which she does not exist Put differently such a person lacks a standing to complain about this future inequality This can be referred to as the Non Identity objection or as the Standing objection to

egalitarianism This book examines how to evaluate different scenarios for humanity's future from an egalitarian perspective. It is argued that planning for the future does require egalitarian considerations but that egalitarianism also needs to be adapted to handle future persons. As indicated, a key challenge concerns how to evaluate mixed populations containing both necessary and possible persons. The book proposes a pluralist approach combining egalitarianism with prioritarianism. Prioritarianism itself also suffers unique problems when applied to the future, chief among them the Separateness of Persons objection. The book attempts to deflect these obstacles and aims to develop a coherent framework that maintains egalitarian principles while appropriately discounting the status of merely possible people. Overall, the book seeks to advance both our ethical assessment of humanity's future and our understanding of the nature of equality and distributive ethics more generally.

This volume comprises the papers and debates of the second France ILO Symposium on the future of work, employment and social protection. Reflecting the aim of the Symposium itself, the book provides in depth reflections on work, employment and social protection. Designed to be more than an account of the discussions, this book is a useful tool for all those interested in labour market transition and the increasing importance of female labour for the future of the labour markets, particularly in the developed world. The book discusses the need for more family friendly policies and a more radical policy of equality between the sexes. The legal dimensions of labour market change are also debated, and the book explores the positive and negative sides of globalization and its links with technological change.
