Martin, 2014-09-01 The first OZCOTS conference in 1998 was inspired by papers contributed by Australians to the 5th International Conference on Teaching Statistics In 2008 as part of the program of one of the first National Senior Teaching Fellowships the 6th OZCOTS was held in conjunction with the Australian Statistical Conference with Fellowship keynotes and contributed papers optional refereeing and proceedings This venture was so successful that the 7th and 8th OZCOTS were similarly run conjoined with Australian Statistical Conferences in 2010 and 2012 Authors of papers from these OZCOTS conferences were invited to

develop chapters for refereeing and inclusion in this volume There are sections on keynote topics undergraduate curriculum and learning professional development postgraduate learning and papers from OZCOTS 2012 Because OZCOTS aim to unite statisticians and statistics educators the approaches this volume takes are immediately relevant to all who have a vested interest in good teaching practices Globally statistics as a discipline statistical pedagogy and statistics in academia and industry are all critically important to the modern information society This volume addresses these roles within the wider society as well as questions that are specific to the discipline itself Other chapters share research on learning and teaching statistics in interdisciplinary work and student preparation for futures in academia government and industry Statistics Catalog 2005 Neil Thomson,2004-09 *Predictive Analytics and Data Mining* Vijay Kotu,Bala Deshpande,2014-11-27 Put Predictive Analytics into Action Learn the basics of Predictive Analysis and Data Mining through an easy to understand conceptual framework and immediately practice the concepts learned using the open source RapidMiner tool Whether you are brand new to Data Mining or working on your tenth project this book will show you how to analyze data uncover hidden patterns and relationships to aid important decisions and predictions Data Mining has become an essential tool for any enterprise that collects stores and processes data as part of its operations This book is ideal for business users data analysts business analysts business intelligence and data warehousing professionals and for anyone who wants to learn Data Mining You ll be able to 1 Gain the necessary knowledge of different data mining techniques so that you can select the right technique for a given data problem and create a general purpose analytics process 2 Get up and running fast with more than two dozen commonly used powerful algorithms for predictive analytics using practical use cases 3 Implement a simple step by step process for predicting an outcome or discovering hidden relationships from the data using RapidMiner an open source GUI based data mining tool Predictive analytics and Data Mining techniques covered Exploratory Data Analysis Visualization Decision trees Rule induction k Nearest Neighbors Na ve Bayesian Artificial Neural Networks Support Vector machines Ensemble models Bagging Boosting Random Forests Linear regression Logistic regression Association analysis using Apriori and FP Growth K Means clustering Density based clustering Self Organizing Maps Text Mining Time series forecasting Anomaly detection and Feature selection Implementation files can be downloaded from the book companion site at www.LearnPredictiveAnalytics.com Demystifies data mining concepts with easy to understand language Shows how to get up and running fast with 20 commonly used powerful techniques for predictive analysis Explains the process of using open source RapidMiner tools Discusses a simple 5 step process for implementing algorithms that can be used for performing predictive analytics Includes practical use cases and examples **Proceedings of the Section on Statistical Education** American Statistical Association. Section on Statistical Education,1998 **SIGKDD Explorations** ,2000 **Basic Computational Techniques for Data Analysis** D Narayana,Sharad Ranjan,Nupur Tyagi,2023-06-20 This book is designed to equip students to navigate through MS Excel and basic data computation methods which are essential tools in research or

professional settings and in classrooms It illustrates the concepts used in research and data analysis and economic and financial decision making in business and in daily life The book will help students acquire knowledge and develop skills in statistical techniques and financial analysis using MS Excel With illustrations and examples it will help the readers to Visualize present and analyze data through MS Excel spreadsheets and tables and create personal or business spreadsheets Learn how to work with spreadsheets use formulae and perform calculations and analysis Create tables including Pivot Tables Become familiar with basic statistical and financial measures Design creative spread sheets and communicate effectively in business using spreadsheets and data analysis This revised and updated second edition will be an essential resource for students of economics commerce management and other social science subjects and will be useful to those studying econometrics financial technology basic computational techniques data analysis and applied economics Content The book intends to illustrate the concepts used in economic and financial decision making in business and in daily life it helps demonstrate a deeper understanding from both theoretical and practical perspectives An effort has been made to make the book student friendly by using simple language and giving a number of illustrations in each chapter solved in such a simple manner that they can be easily understood by the students Practical questions have been included at the end of each chapter so that the students can independently solve them and test their understanding of the concepts and computations introduced in the chapter Outcome At the end students will be able to describe what a spreadsheet is and what Excel s capabilities are and can work with elements that make up the structure of a worksheet They will be able to work with spreadsheets and enter data in Excel use formulae and calculations and create tables charts and pivot tables They will be familiar with basic statistical and financial measures of general use They will be able to do basic computations in statistics and finance in Excel Students will acquire the capacity to create personal and or business spreadsheets following current professional and or industry standards Their potential for critical thinking to design and create spreadsheets and communicate in a business setting using spreadsheet vocabulary will be enhanced The educational background required for the student to understand the text is some basic English and Mathematics of school leaving level Some fl air for numbers will be an asset and for them it will be a breeze others will have to make an effort but ample illustrations and practice questions make life simple whether it is basic statistics or slightly intricate finance
