State Succession Relating to Unequal Treaties Lung-Fong Chen, 1974 Recognition in International Law: A Bibliography Stefan

Talmon, 2000-09-20 The bibliography lists the literature and State practice on the question of recognition in international law for the last two hundred years. It contains books and articles i.e. contributions to journals and other collected works such as *Festschriften* and *Encyclopaedias* as well as published and unpublished theses, pamphlets, compilations of diplomatic documents and case notes. As many of the monographs on recognition in international law will not be available in all libraries, book reviews have been included in the bibliography in order to enable the user to decide whether it may be advisable to order a certain work by inter-library loan. Its 4 500 entries are arranged systematically according to subject categories in fourteen main sections. Each main section is further subdivided with ever increasing specificity into sub-sections on codification, codification attempts, general studies, studies of certain recognition questions and studies of specific recognition cases. The bibliography employs a broad meaning of recognition. It is not restricted to the question of status of an authority or entity in international law but encompasses also the question of relations with it. As many of the recognition cases must be considered and can only be understood against their historic, political and sometimes even economic background, the bibliography includes not only purely legal treaties but also publications of a primarily historical, political or economic content which incidentally deal with aspects of recognition in international law. This is reflected by the titles of the 730 journals from more than 50 countries in 20 different languages which have been used to compile the bibliography. The bibliography contains both an author and a comprehensive subject index to enable users to locate works of a particular writer or a specific problem.
