The Organization Ecology of Interest Communities Darren Halpin, David Lowery, Virginia Gray, 2016-04-29 This volume summarizes the origins and development of the organization ecology approach to the study of interest representation and lobbying and outlines an agenda for future research Multiple authors from different countries and from different perspectives contribute their analysis of this research program

Lobbying in America Ronald J. Hrebenar, Bryson B. Morgan, 2009-03-03 A comprehensive presentation of the way lobbying and interest based political activism works in the United States Lobbying in America A Reference Handbook offers readers an insightful survey of interest group politics in the United States the strategies techniques and impact both positive and negative Written by one of the nation s premier scholars on the subject it reveals the inner workings of the lobbying process like no other volume before it Lobbying in America traces the growth of interest groups from the nation s infancy to the present The book examines a range of related issues and controversies including infamous scandals attempts to regulate lobbying and the overriding constitutional question of whether limiting money in politics is an infringement of free speech Comparisons to lobbying systems in other countries as well as listings of key organizations and an extensive bibliography round out a volume that could not be more timely

The Population Ecology of Interest Representation Virginia Gray, David Lowery, 1996 This examination of lobbying communities explores how interest group populations are constructed and how they influence politics and public policy By examining how populations of interest groups are comprised this work fills an important gap between existing theories of the origins of individual interest groups and studies of interest group influence The population ecology model of interest communities developed here builds on insights first developed in population biology and later employed by organizational ecologists The model s central premise is that it is the environmental forces confronting interest organizations that most directly shape the contours of interest populations After examining the demography of interest organizations in the fifty American states the population ecology model is used to account for variations in the density and diversity of their interest communities the nature of competition among similar interest organizations to establish viable niches and the impact of alternative configurations of interest communities on the legislative process and the policies it produces These empirical findings suggest that the environment of interest communities is highly constraining limiting their size composition and potential impact on politics Virginia Gray is Professor of Political Science University of Minnesota David Lowery is Burton Craige Professor of Political Science University of North Carolina at Chapel Hill

Lobbying for Higher Education Constance Ewing Cook, 1998 Historically many faculty and administrators in higher education have regarded themselves as above the fray part of the national interest not a special interest and considered lobbying a dirty business unworthy of their lofty enterprise Now that academia no longer enjoys all the respect and good will that federal policy makers once afforded it that attitude has changed The Republican sweep of the 1994 Congressional elections served as a wake up call for the higher

education community In response it made a spirited effort to gain attention for its own policy preferences Lobbying for Higher Education is about how the major higher education associations and the constituent American colleges and universities try to influence federal policy especially congressional policy In clear prose Cook explains how the higher education community organizes itself in Washington how it lobbies and how its major interest groups are perceived both by their own members and by public officials The book focuses on the crucial development in 1995 1996 of a new lobbying paradigm which included the greater use of campus based resources and ad hoc coalitions The most engrossing part of its story is higher education s creative response to the policy turmoil and disruption of the status quo that resulted from the shift in congressional party control The author Constance Cook uses sources unique to this project over 1 500 survey responses from college and university presidents a 62% return rate and nearly 150 interviews with institutional and association leaders Fortuitously the 1994 electoral upheaval provided her with an opportunity to capture analyze and interpret the responses of her subjects in a period of unusually sweeping change Lobbying for Higher Education is a timely book with an interesting and important story at its core

Sovereign Rules and the

Politics of International Economic Law Marc Froese, 2018-03-20 How ought scholars and students to approach the rapidly expanding and highly multidisciplinary study of international economic law Academics in the field of international political economy used to take for granted that they worked with the overarching concepts of rules and governance while legal scholars analyzed treaties and doctrines However over the past twenty years formerly disparate fields of study have converged in a complex terrain where academic researchers and governmental policy analysts use a pluralistic set of theoretical and methodological tools to study the ongoing development of international economic law This volume argues that the extensive development of international economic law makes it impossible to discuss international political economy and international law as if they were mutually exclusive processes or even as if they were separate and mutually reinforcing Rather we must think of them as a deeply interconnected set of rapidly evolving activities This is a paradigm shift in which we cease to think about an international system in which politics and law interact and begin to think about an international system in which politics take place in a legal frame Froese terms this a shift from politics and law to the politics of international economic law This book does for political economy what others have already done for law introduces political scientists economists and other practitioners of IPE to the potential of engaging with legal theory and method it will be of great interest to scholars in a range of areas including IPE global governance IR and international law Representation and Reform Thomas Gais, 1993

Interests and Institutions Robert H. Salisbury, 1992-10-15 Interest and Institutions is a collection of essays written by distinguished political scientist Robert Salisbury a leading analyst of interest group politics He offers his theories on the workings and influence of groups organizations and individuals in many different areas of American politics *Developing Interests* McGee Young, 2010-02-04 Organized interests are perennially under fire for distorting public policies Critics charge that they privilege the demands of favored constituencies at the expense of the broader public interest Yet despite the importance of interest groups in the political process little systematic research has been conducted into the development of political identities and lobbying capacities among major advocacy organizations How does a group come to represent a set of interests Are the identities and policy priorities of advocacy organizations stable over time or do they evolve What causes such evolution to occur and what tensions arise as a consequence This book explores the development of interest group politics in the United States through the defining lens of four key advocacy associations in two major and highly contested policy domains the small business and environmental lobbies Through close examination of the National Small Business Association National Federation of Independent Business Sierra Club and National Resources Defense Council McGee Young addresses questions of how groups come to represent particular interests which groups succeed and which fail and how groups shape political institutions Young explains how political opportunities shape entrepreneurial efforts to form organizations how formative events shape advocacy strategies and tactics and how an interest group's identity arises from entrepreneurial opportunity seekers interacting with the broader ebb and flow of politics He

shows that received understandings of what constitutes a small business or environmental interest only gradually solidified as policy conflicts forced group leaders to stake out firm principles such as when pivotal battles in the 1950s over Western dams intersected with a longstanding membership tradition to transform the Sierra Club or when the NFIB struggled to balance its conservatism with its hostility toward big business to the dismay of its political allies *Developing Interests* bridges the gap between traditional interest group research and new research in American political development It marks the first extensive study of small business interest groups in more than 40 years while its organizational perspective provides a fresh look at environmental politics and it features the first organizational histories of the NFIB the NSBA and the NRDC With its illuminating case studies of small business lobbies and environmental groups over time it provides readers with new insights into both the theoretical and empirical significance of interest group development

The Interest Group Society Jeffrey M. Berry, Clyde Wilcox, 2018-02-19 Considered the gold standard on interest group politics this widely used text analyzes interest groups within the intuitive framework of democratic theory enabling readers to understand the workings of interest groups within the larger context of our political system Comprehensive coverage includes not only the traditional farm labor and trade associations but also citizen groups public interest organizations corporations and public interest firms Brief in page count yet comprehensive in coverage the book is flexible for different class settings The book's rich content and lean size allows it to stand alone as the centerpiece of a course or be assigned as one of several texts New to the Sixth Edition Updates the role of money in interest group activity following the Citizens United Supreme Court decision Covers new interest group actors including the Tea Party Occupy and others Examines new developments in key interest group arenas including health care and the environment Looks at the role of social media in interest groups Adds a comparative look at interest group action organization and scholarship abroad

Leadership and Politics Bryan D. Jones, 1989 In twelve essays influential scholars in political science explore the meaning of political leadership from the kaleidoscopic perspectives of the leaders institutions goals procedures problems and traditions involved The approaches as varied as the subject itself coalesce around the central question of how leaders interact with transform or are controlled by the organizations they lead

Black Americans and the Political System Lucius Jefferson Barker, Jesse J. McCorry, 1976 This is a book about how black people fare in the American political system But it is more than just another book on black politics It may also be viewed as an introduction to American national government Indeed the thrust of this volume is an attempt to combine the salient features of black politics with those of American politics generally Page vii
