

# COHERENCE THEORY OF TRUTH

- States a statement (a proposition) is true if consistent with other things considered true (and don't contradict it)
- A pencil falls, I hear it, a 2<sup>nd</sup> person hears it, it is now gone from table but I saw it a moment ago.
- 3 observations fit:
  - I hear it
  - 2<sup>nd</sup> person hears it
  - Missing pencil
- According to coherence theory, the proposition "the pencil hit the ground" is true
  - (did it really hit the ground, or is there another explanation?)

*The Coherence of Theory of Truth* Nicholas Rescher, 1982-03-10      The coherence theory of truth Nicholas Rescher, 1982      The Coherence Theory of Truth Ralph Charles Sutherland Walker, 1989-01-01      **The Coherence Theory of Truth** Ralph C.S. Walker, 2024-11-01 First published in 1988 Clarifies the coherence theory and critically discusses the standard objections to it as well as those who can be interpreted as advocating it This book should be of interest to students of philosophy and epistemology and professional philosophers In the view of the author contemporary philosophy the coherence theory of truth occupies rather an odd position On the one hand a number of textbook arguments against it are widely accepted arguments which make it look as though the theory is hardly worth serious attention On the other hand some of the principal currents of philosophical thought seem to be flowing away from the traditional conception of truth and towards a different conception one which some of its supporters and some of its detractors have recognized as taking truth to consist in coherence In the first two chapters the author tries to clarify what the coherence theory is and is not to show that it deserves serious attention and to exhibit the pressures that can drive one towards it Also attempted is to show how it relates to various other things that philosophers have said about truth and also to idealism and anti realism      **The Possibility of Relative Truth** Peter Davson-Galle, 2019-07-25 First published in 1998 this book is an investigation of the possibility of articulating a coherent thesis of truth relativism within first a host correspondence theory of truth and second a host coherence theory of truth The type of relativism addressed in the book is what is sometimes called framework relativism that where truth is relativised to a framework of belief or conceptual scheme A further restraint is that a global relativistic thesis is sought one which is relativistic about all truths The book does not set itself the task of defending relativism but just that of seeking a coherent articulation of it      *The Coherence Theory of Truth* Ralph C. S. Walker, 2008      Real Knowing Linda Alcoff, 1996 Real knowing always involves a political dimension Linda Martin Alcoff suggests But this does not mean we need to give up realism or the possibility of truth Recent work in continental philosophy insists on the influence that power and desire exert on knowing whereas contemporary analytic philosophy largely ignores these political concerns in its accounts of justification and truth Alcoff engages these traditionally conflicting approaches in a constructive dialogue effectively spanning the analytic continental divide In provocative readings of major figures in the continental tradition Alcoff shows that the work of Hans Georg Gadamer and Michel Foucault can help rectify key problems in coherence epistemology such as the link between coherence and truth She also argues that discussions about knowledge among continental philosophers can benefit from the work of analytic philosophers Donald Davidson and Hilary Putnam on meaning and ontology Alcoff makes a compelling case for the need to address truth as a metaphysical issue in contrast to minimalist tendencies in Anglo American philosophy and deconstructionism on the continent Her work persuasively argues for coherentist epistemology as a more realistic reconfiguration of the ontology of truth      **The Coherence Theory of Truth**

**Choosing Truth** Neil Douglas, Terry Wykowski, 2025-06-08 Truth is deeply consequential truth is the fundamental requirement for justice in a court of law for addressing threats to democracy and good governance climate change inequality racism poverty gun violence conflict among nations and weapons of mass destruction Commitment to truth underpins any effort to overcome ignorance obfuscation propaganda fallacy and a culture burdened with disinformation But while we are influenced by claims of truth we don't always know what truth is and how much it matters While sustaining a standard of truth has always been difficult a perfect storm of declining commitment to fact based media practices and patterns of normalized dishonesty seems to have emerged It has been said that truth is not dying it's being killed Given that we are constrained in our ability to act in defense of what we don't understand the authors aim to set out a coherent and comprehensive account of the meaning and implications of truth in the range of contexts that are meaningful for us as individuals as civilized societies and as a species Choosing Truth explores truth in its multiple dimensions and manifestations and presents novel and pragmatic concepts that integrate the content and application of truth seeking approaches This important and timely new book can act as a text or supplemental reading in practical philosophy but also in an array of disciplines where truth is deeply meaningful such as education political

**The Current State of the Coherence Theory** J. Bender, 2012-12-06 The subtitle of this book should be read as a qualification as much as an elaboration of the title If the goal were completeness then this book would have included essays on the work of other philosophers such as Wilfrid Sellars Nicholas Rescher Donald Davidson Gilbert Harman and Michael Williams Although it would be incorrect to say that each of these writers has set forth a version of the coherence theory of justification and knowledge it is clear that their work is directly relevant and reaction to it could easily fill a companion volume This book concentrates however on the theories of Keith Lehrer and Laurence Bonjour and I doubt that any epistemologist would deny that they are presently the two leading proponents of coherentism A sure indication of this was the ease with which the papers in this volume were solicited and delivered The many authors represented here were willing prepared and excited to join in the discussion of Bonjour's and Lehrer's recent writings I thank each one personally for agreeing so freely to contribute All of the essays but two are published for the first time here Marshall Swain's and Alvin Goldman's papers were originally presented at a symposium on Bonjour's The Structure of Empirical Knowledge at the annual meeting of the Central Division of the American Philosophical Association Chicago Illinois in April 1987
