The Cold And The Dark The World After Nuclear War:

The Cold and the Dark Paul Ralph Ehrlich, 1984 **The Cold and the Dark** Paul R. Ehrlich, 1984 **The Cold and the Dark**, 1984 **Behind the Curve** Joshua P. Howe, 2014-04-01 In 1958 Charles David Keeling began measuring the concentration of carbon dioxide in the earth's atmosphere at the Mauna Loa Observatory in Hawaii. His project kicked off a half century of research that has expanded our knowledge of climate change. Despite more than fifty years of research, however, our global society has yet to find real solutions to the problem of global warming. Why? In *Behind the Curve*, Joshua Howe attempts to answer this question. He explores the history of global warming from its roots as a scientific curiosity to its place at the center of international environmental politics. The book follows the story of rising CO₂ illustrated by the now famous Keeling Curve through a number of historical contexts, highlighting the relationships among scientists, environmentalists, and politicians as those relationships changed over time. The nature of the problem itself, Howe explains, has privileged scientists as the primary spokespeople for the global climate. But while the science first forms of advocacy they developed to fight global warming produced more and better science, the primacy of science in global warming politics has failed to produce meaningful results. In fact, an often exclusive focus on science has left advocates for change vulnerable to political opposition and has limited much of the discussion to debates about the science itself. As a result, while we know much more about global warming than we did fifty years ago, CO₂ continues to rise. In 1958, Keeling first measured CO₂ at around 315 parts per million; by 2013, global CO₂ had soared to 400 ppm. The problem is not getting better; it's getting worse. *Behind the Curve* offers a critical and levelheaded look at how we got here. **The Cold and the Dark** George W. Rathjens, 1985
BBC Wildlife, 1984 **Library Journal**, 1990-07 **Ways Out of the Arms Race** William Kerby, Rainer Rilling, 1987
Current Research by Western Canadian Geographers Edgar Lionel Jackson, Edgar L. Jackson, 1985 **Public Economics III** Edward Tower, Jürgen Brauer, 1995 *Security Studies for the 1990s* Richard H. Shultz, Roy Godson, Ted Greenwood, 1993 The United States is grappling with a new security framework to replace the structure of the Cold War era. American policymakers face a host of challenges, including regional conflicts, ethnic tensions, and weapons proliferation that commanded little attention in the past. And tomorrow is likely to bring new concerns barely on today's horizon. Despite these changes, the study of national security remains largely a creature of the Cold War. The security studies discipline needs to be overhauled. But how should it be revised so that tomorrow's citizens and experts are equipped to understand and help manage new challenges? One option is to downgrade security studies and divert educational resources elsewhere. Another is to redefine the subject to include the study of an all-encompassing list of international problems. The third choice is to retain basic definitions, concepts, and subjects while also making significant adjustments. *Security Studies for the 1990s* addresses all three options. This book is the first to reexamine security studies in the post-Cold War era. Scholars and directors from leading security studies programs representing a cross-section of viewpoints on foreign affairs discuss what new material

needs to be taught and which courses and concepts should be recast Each chapter provides an indepth review of a major security studies course proposing needed changes and a model syllabus Subjects include intelligence policy global environmental problems the causes and termination of wars and collective security A chapter on the teaching of ethics a subject often neglected in the past is also featured
