The Coming Currency Collapse And What You Can Do About It:

The Coming Bond Market Collapse Michael G. Pento, 2013-04-22 The coming financial apocalypse and what government and individuals can do to insulate themselves against the worst shocks In this controversial book a noted adherent of Austrian School of Economics theories advances the thesis that the United States is fast approaching the end stage of the biggest asset bubble in history He describes how the bursting of the bubble will cause a massive interest rate shock that will send the US consumer economy and the US government pumped up by massive Treasury debt into bankruptcy an event that will send shockwaves throughout the global economy Michael Pento examines how policies followed by both the Federal Reserve and private industry have contributed to the impending interest rate disaster and highlights the similarities between the US and European debt crisis But the book isn't all doom and gloom Pento also provides well reasoned solutions that government industry and individuals can take to insulate themselves against the coming crisis Paints an alarmingly vivid picture of the massive interest rate shock which soon will send consumers and the government into bankruptcy Backed by a wealth of historical and economic data Pento explains how the bubble was created and what the U S can do to mitigate the impending crisis Provides investors with sound strategies for protecting themselves and their assets against the coming financial apocalypse Explains why retirees in particular will be at risk as real estate prices decline pensions weaken and the bond bubble bursts

The Heavens Are Falling Walter J. Karplus, 2013-11-11 Each day we are bombarded with news of a new catastrophe of worldwide proportions promising to obliterate a part if not all of humankind Confronted with these warnings of impending doom our best defense is to understand how valid or invalid these predictions of calamity are By perceiving these threats in a wise and sagacious way we can best meet future challenges by not earmarking precious resources for wrong or misleading reasons Walter Karplus a professor of computer sciences at UCLA in his 35 years of experience has made predictions for all kinds of phenomena by generating models and computer simulations His decades of experience have taught him what we can and cannot predict with any accuracy Dr Karplus surveys the most hotly debated catastrophes that many scientists have predicted will imminently endanger the lives of countless people all over the globe These catastrophes include the depletion of the ozone layer the Greenhouse Effect nuclear radiation acid rain the AIDS epidemic the population explosion another Great Depression and earthquakes Drawing on his superb background he assesses the strengths and weaknesses of arguments propounding the seriousness of these calamities All the while he never allows us to lose sight of the profound shortcomings of scientific prediction In his singularly engaging manner Dr Karplus traces the fascinating art of prediction from our earliest ancestors to today He pronounces at what point prediction even within science becomes a black art He elucidates the problems that computer simulations have in predicting events and goes on to pinpoint when and where these models lapse into the area of pure conjecture Through reason and wit Walter Karplus teaches us how to bring a trained eye to the predictions of disaster that unceasingly assault us
