**The Climate Mandate** Walter Orr Roberts, Henry Lansford, 1979      **Local Government Implementation of Environmental Mandates**, 1993      **International Yearbook of Soil Law and Policy 2022** Harald Ginzky, Fabiano De Andrade Corrêa, Elizabeth Dooley, Irene L. Heuser, Patricia Kameri-Mbote, Robert Kibugi, Oliver C. Ruppel, 2024-03-01 This open access book presents an important discussion on the interface between sustainable soil management and climate mitigation and adaptation. It investigates a variety of aspects in this context such as the political and societal consequences for countries in the Global South, an assessment of the outcomes of the UNFCCC Conference of Parties held in Glasgow, appropriate legal instruments to promote desirable regulatory concepts for negative emissions in soil and land use, the debate in Europe on carbon uptake in soils and the climate related policy of the Convention on Biological Diversity. Lastly, it provides information on recent court rulings on climate mitigation in Germany and Australia and their relevance for sustainable soil management. This sixth volume of the International Yearbook of Soil Law and Policy is divided into four parts, the first of which deals with various aspects of the theme Climate Mitigation and Adaptation and Sustainable Soil Management. The second part covers recent international developments, the third presents regional and national reports, and the fourth discusses overarching issues. Given the range of key topics covered, the book offers an indispensable tool for all academics, legislators, and policymakers working in this field. The International Yearbook of Soil Law and Policy series discusses central questions in law and politics with regard to the protection and sustainable management of soil and land at the international, national, and regional level.      *Climate Change at the City Scale* Anton Cartwright, Susan Parnell, Gregg Oelofse, Sarah Ward, 2012-06-14 Climate change impacts are scale and context specific, and cities are likely to bear some of the greatest costs. In recent years, cities have begun to craft their own climate change responses against the backdrop of the reluctance displayed by nation states in committing to emissions reductions and managing the consequences of climate change. *Climate Change at the City Scale* presents a fresh contribution to climate change literature which has largely neglected the role of cities in spite of their increasingly important role in the global economy. The book focuses on the impacts of climate change in the rapidly evolving city of Cape Town and captures the experiences of the Cape Town Climate Change Think Tank, a hybrid knowledge partnership which has produced research on a range of urban governance impacts, mitigation, and adaptation challenges. By the City of Cape Town, which has long been acknowledged as an innovator in the area of urban environmental management notwithstanding its limited resources to manage the demand for a more resilient and equitable future. By documenting the work and experiences of the City's efforts to define its own climate future, the book provides a provocative case study of the way in which the science-policy interface can be managed to inform urban transformation.      **Thought, Law, Rights and Action in the Age of Environmental Crisis** Anna Grear, Evadne Grant, 2015-07-31 In the climate-pressed Anthropocene epoch, nothing could be more urgent than fresh engagements with the
