Casinonomics Douglas M. Walker,2013-05-15 Casinonomics provides a comprehensive analysis of the economic and social impacts of the casino industry Examining the latest cutting edge research with a mix of theory and empirical evidence Casinonomics informs the reader on the most important facets at the forefront of the public policy debate over this controversial industry While the casino industry has continued to expand across the United States and around the world critics argue that casinos bring negative social impacts that offset any economic benefits Casinonomics examines the evidence on the frequently claimed benefits and costs stemming from expansions in the casino industry including the impact on economic growth consumer welfare and government tax revenues as well as gambling disorders crime rates and the impact on other businesses Readers will come away with a better informed opinion on the merits of these arguments for and against public policies that would expand casino gambling      **Facility Siting in the AsiaPacific** Fung Tung,S. papers accepted and presented at the 2019 Vietnam's Business and Economics Research Conference VBER2019 organised by Ho Chi Minh City Open University held on 18th-20th July 2019. The Special Issue is associated with a broad coverage of the contemporary issues in Business and Economics in Vietnam and other emerging markets reflecting a key theme of VBER2019: Vietnam's Place in the Asia Pacific Region. A total of 14 papers were published from more than the 120 submissions to the VBER2019 Conference. Published papers had been undergone a rigorous reviewing process conducted by the Journal of Risk and Financial Management. The papers incorporated in this book address contemporary issues in business and economics from Vietnam and other emerging markets in the Asian region from various angles such as economics, finance and statistics to management science. At the time of writing this note, some of the papers have attracted more than 1000 downloads in 3 months. In particular, a paper on Foreign Direct Investment and Economic Growth from Developing Countries in the Short Run and Long Run by Trang Thi Huyen Dinh and her team has attracted almost 6000 downloads in 3 months. These statistics indicate that the papers published in this Special Issue have attracted the wide interest of readers. Among these 14 published papers, three main areas of important contemporary issues in Business and Economics in the Asian region can be identified. First, a block of papers deals with various important and fundamental issues in the emerging markets of the Asian region from exchange rate regime, financial inclusion and financial development to energy consumption and environmental degradation. On the issue of CO<sub>2</sub> emissions, energy consumption and economic growth in the ASEAN, Vo Vo and Le utilized various time series econometrics approaches. Key findings from this paper indicate that there are no long-run relationships among carbon dioxide, CO<sub>2</sub> emissions, energy consumption, renewable energy, population growth and economic growth in the Philippines and Thailand, but a relationship does exist in Indonesia, Myanmar and Malaysia. Loo, in his paper on financial inclusion for the ASEAN, concluded that advancing internet capability and availability presents investors an opportunity to offer financial technology or Fintech to meet the need for financial services in this digital era. Second, a challenge in quantitative studies for a single country such as Vietnam with limited data is generally noted. However, various empirical studies on Vietnam's business and economics issues have been conducted. Nguyen Quan and Pham examined the cultural distance and entry mode of foreign direct investment in Vietnam. A key finding from their paper is that when there is a great cultural difference between Vietnam and their home country, foreign-invested firms prefer wholly owned subsidiaries over equity joint ventures. Within the Vietnamese market, Pham Vo Ho and McAleer conducted a study on the issue of corporate financial distress. The authors conclude that the corporate financial distress prediction model which includes accounting factors with macroeconomic indicators performs much better than alternative models. In addition, the evidence confirms that the global financial crisis (GFC) had a damaging impact on each sector, with the Health Education sector demonstrating the most impressive recovery post GFC and the utilities sector recording a dramatic increase in bankruptcies post GFC. At another extreme of the spectrum, Van and Nguyen considered that competitive context socially influences the understanding of

managers about corporate social responsibility CSR and the internal environment of companies are the four drivers of CSR. The authors also argued that in the four drivers competitive context has the strongest impact on adopting CSR. Third last but not least various papers focus on an important aspect of public finance. For an example Pham Pham and Ly documented the effect of double taxation treaties on the bilateral trade of Vietnam with ASEAN member states thereby making an extensive comparison with its EU partner countries. Their findings indicate the significant contributions of the tax treaties to Vietnam's trade performance not exclusively with ASEAN but also with EU partner countries. In addition regarding public finance for Vietnam Nguyen Vo Ho and Vo investigated the contribution of fiscal decentralisation to economic growth across provinces in Vietnam. For the first time in Vietnam the fiscal decentralisation index together its two subcomponents including fiscal importance and fiscal autonomy are developed. Findings from this paper indicate that while fiscal importance and an overall level of fiscal decentralisation have provided negative impact on provincial economic growth fiscal autonomy has a positive impact on economic growth across provinces in Vietnam.

B. Bradshaw's Dictionary of Mineral Waters : Climatic Health Resorts, Sea Baths, and Hydropathic Establishments ... Bradshaw,1886      The ... Casino and Gaming Business Market Research Handbook ,2003      Metabolical Robert H. Lustig,2021-05-04 The New York Times bestselling author of *Fat Chance* explains the eight pathologies that underlie all chronic disease documents how processed food has impacted them to ruin our health economy and environment over the past 50 years and proposes an urgent manifesto and strategy to cure both us and the planet. Dr Robert Lustig a pediatric neuroendocrinologist who has long been on the cutting edge of medicine and science challenges our current healthcare paradigm which has gone off the rails under the influence of Big Food Big Pharma and Big Government. You can't solve a problem if you don't know what the problem is. One of Lustig's singular gifts as a communicator is his ability to connect the dots for the general reader in order to unpack the scientific data and concepts behind his arguments as he tells the real story of food and the story of real food. *Metabolical* weaves the interconnected strands of nutrition health disease medicine environment and society into a completely new fabric by proving on a scientific basis a series of iconoclastic revelations among them: Medicine for chronic disease treats symptoms not the disease itself. You can diagnose your own biochemical profile. Chronic diseases are not druggable but they are foodable. Processed food isn't just toxic it's addictive. The war between vegan and keto is a false war the combatants are on the same side. Big Food Big Pharma and Big Government are on the other side. Making the case that food is the only lever we have to effect biochemical change to improve our health Lustig explains what to eat based on two novel criteria protect the liver and feed the gut. He insists that if we do not fix our food and change the way we eat we will continue to court chronic disease bankrupt healthcare and threaten the planet. But there is hope this book explains what's needed to fix all three.
