Books,1984-01-01 After receiving a tip from a strange letter high school senior Skip Malone and his friend reporter Scoop Doogan attempt to thwart plans to disrupt an upcoming political rally      **The Guns at Last Light** Rick Atkinson,2013-05-14 In the first two volumes of his bestselling Liberation Trilogy Rick Atkinson recounted how the American led coalition fought through North Africa and Italy to the threshold of victory Now he tells the most dramatic story of all the titanic battle for Western Europe D Day marked the commencement of the European war s final campaign and Atkinson s riveting account of that bold gamble sets the pace for the masterly narrative that follows The brutal fight in Normandy the liberation of Paris the disaster that was Market Garden the horrific Battle of the Bulge and finally the thrust to the heart of the Third Reich all these historic events and more come alive with a wealth of new material and a mesmerizing cast of characters With the stirring final volume of this monumental trilogy Rick Atkinson s remarkable accomplishment is manifest He has produced the definitive chronicle of the war that unshackled a continent and preserved freedom in the West      Len Deighton 3-Book War Collection Volume 1: Bomber, XPD, Goodbye Mickey Mouse Len Deighton,2013-09-26 Three classic novels of the Second World War by the greatest war novelist of our time together in one e bundle for the first time      **Child of Another Century** Ronald Waterhouse,2013-03-27 The 20th century saw a period of enormous legal and social change in Britain In these engaging memoirs Ronald Waterhouse who sat as one of Britain s leading High Court Judges provides fascinating frontline insights into the complex British legal system Waterhouse took silk in 1969 and became a High Court judge in 1978 in the Family Division transferring to the Queen s Bench in 1988 where he presided over well known trials such as those of Ken Dodd and Derek Hatton Libel including reading libel for Private Eye with Richard Ingrams and Paul Foot civil and personal injury work were a prominent part of his practice After his retirement he was appointed Chairman of the Tribunal of Inquiry into Child Abuse in North Wales Children s Homes in 1996 It was during this time that he went onto lead the biggest inquiry into child abuse ever held in Britain publishing the highly significant and influential report Lost in Care in 2000 From his early career as a barrister at Middle Temple which saw his involvement in high profile cases such as the notorious Moors Murders in the 1960s and Slater Walker in the 1970s to his later work as a Judge Waterhouse here presents a detailed and authoritative narrative of British jurisprudence in the second half of the 20th century This unique insider s view will fascinate general readers and prove essential reading for specialists      **Environment as a Weapon** Charles Travis,2024-03-20 Environment as a Weapon considers how the confluence of war and nature from the time of the Agricultural Revolution 10 000 BCE to our present day has been represented in works of history geography and literature In the Epic of Gilgamesh the Torah and Greco Roman myths warfare is a trope commensurate with environmental disasters extreme climate and plague In the medieval age myths the T in and Beowulf environments become allies and enemies The equestrian steppeland as

foundation of Genghis Khan's and his heirs Pax Mongolica is chronicled in *The Secret History of the Mongols* and *The Travels of Marco Polo*. The West African Griot legend of Sundiata and the Little Ice Age wreck of the Spanish Armada in 1588 speak to oceanic and atmospheric dimensions of warfare. American Revolution political pamphlets, poetry, diaries, and weather logs reflect the severe weather and terrain deployed by George Washington's early campaigns in the war of independence. Napoleon's midwifing of Total War is captured in Mary Shelley's *Frankenstein*, Leo Tolstoy's *War and Peace*, and Charles Minard's Carte figurative cartograph of the disastrous 1812 French invasion of Russia. The U.S. Civil War and the organic industrial assembles of its battles arguably the first Anthropocene War is parsed by the clarifying poetry of Emily Dickinson. Geopolitik and geo hazards of flood and fire feature in the Global War works of Samuel Beckett, Kurt Vonnegut, and James Dickey. The literature of Vietnamese and American war combat veterans reveals how North Vietnam's Environmental Military Complex stalled the American Military Industrial Complex in the jungles and R.R. districts of southwestern Asia. Finally, the sci-fi of H.G. Wells' *World Set Free* and David Mitchell's *Cloud Atlas* frame Oppenheimer's sub-atomic deployments at Hiroshima and Nagasaki. James Lovelock's *Gaia* and U.S. military discourses situating global warming as a national security threat to America. Indeed, *Environment and War* ironically resonates with U.N. Secretary General António Guterres' proclamation that seventy-five years ago the world emerged from a series of cataclysmic events: two successive world wars, genocide, a devastating influenza pandemic. Our founders gathered in San Francisco promising to save succeeding generations from the scourge of war. Thus, a holistic approach to studying and mitigating the human and environmental impacts of warfare must integrate methods from the arts, humanities, and sciences. This involves understanding how the historical geographies of the Earth's planetary systems have been perceived, deployed, and emerged as agents of warfare with the lithosphere, hydrosphere, cryosphere, biosphere, and atmosphere transformed as arsenals against anthropogenic global warming. This book will be of interest to geographers, historians, and scholars in environmental studies, climate change literature, and military studies, as well as the broader environmental humanities.

**Aircraft**, 1982      **Fires and Human Behaviour** David

Canter, 2024-06-03 This second edition of *Fires and Human Behaviour* was originally published in 1990 and since the first edition in 1980 there continued to be considerable loss of life in small and large fires throughout the world. The most significant of these from a behavioural point of view was the Kings Cross underground station in 1988. This was a relatively small fire caused by inappropriate human actions. What appeared to remain timeless and of value ten years after the first edition was published were the details of what actually happens in fires and the psychological models that emerged from studying those details. This second edition was therefore edited to keep the original detailed case studies and to add

Westermann, 2001 Air raid sirens wail searchlight beams flash across the sky and the night is aflame with tracer fire and aerial explosions as Allied bombers and German anti aircraft units duel in the thundering darkness Such cinematic scenes played out with increasing frequency as World War II ground to a close were more than mere stock material for movie melodramas As Edward Westermann reveals they point to a key but largely unappreciated aspect of the German war effort that has yet to get its full due Long the neglected stepchild in studies of World War II air campaigns German flak or anti aircraft units have been frequently dismissed by American British and German historians and by veterans of the European air war as ineffective weapons that wasted valuable materiel and personnel resources desperately needed elsewhere by the Third Reich Westermann emphatically disagrees with that view and makes a convincing case for the significant contributions made by the entire range of German anti aircraft defenses During the Allied air campaigns against the Third Reich well over a million tons of bombs were dropped upon the German homeland killing nearly 300 000 civilians wounding another 780 000 and destroying more than 3 500 000 industrial and residential structures Not surprisingly that aerial Armageddon has inspired countless studies of both the victorious Allied bombing offensive and the ultimately doomed Luftwaffe defense of its own skies By contrast flak units have virtually been ignored despite the fact that they employed more than a million men and women were responsible for more than half of all Allied aircraft losses forced Allied bombers to fly far above high accuracy altitudes and thus allowed Germany to hold out far longer than it might have otherwise Westermann's definitive study sheds new light on every facet of the development and organization of this vital defense arm including      The Story of the Bomber, 1914-1945 Bryan Cooper, 1974      **Ordnance** ,1945      *El-Hi Textbooks and Serials in Print* ,2006      **Army Ordnance** ,1945      *Western Conservation Journal* ,1958      **Air Corps News Letter** ,1943      **Air Force** ,1943 Vols 41 no 11 v 42 no 5 include Space digest v 1 2 no 5 Nov 1958 May 1959
