Kaplan, 1983 **Mr Selden's Map of China** Timothy Brook, 2013-09-12 In 1659 a vast and unusual map of China arrived in the Bodleian Library Oxford It was bequeathed by John Selden a London business lawyer political activist former convict MP and the city's first Orientalist scholar Largely ignored it remained in the bowels of the library until called up by an inquisitive reader When Timothy Brook saw it in 2009 he realised that the Selden Map was a puzzle that had to be solved an exceptional artefact so unsettlingly modern looking it could almost be a forgery But it was genuine and what it has to tell us is astonishing It shows China not cut

off from the world but a participant in the embryonic networks of global trade that fuelled the rise of Europe and which now power China's ascent. And it raises as many questions as it answers: how did John Selden acquire it? Where did it come from? Who reimagined the world in this way? And most importantly, what can it tell us about the world at that time? Brook, like a cartographic detective, has provided answers including a surprising last-minute revelation of authorship. From the Gobi Desert to the Philippines, from Java to Tibet and into China itself, Brook uses the map, actually a schematic representation of China's relation to astrological heaven, to tease out the varied elements that defined this crucial period in China's history.

*Beijing's Power and China's Borders* Bruce Elleman, 2014-12-18. China shares borders with 20 other countries. Each of these neighbors has its own national interests, and in some cases these include territorial and maritime jurisdictional claims in places that China also claims. Most of these 20 countries have had a history of border conflicts with China; some of them never amicably settled. This book brings together some of the foremost historians, geographers, political scientists, and legal scholars on modern Asia to examine each of China's twenty land or sea borders.
