Scott,2017-12-02 Stendhal s most independent heroines are usually disliked or marginalized by critics However when gender neutral criteria are applied Mina de Vanghel Vanina Vanini Mathilde de La Mole and Lamiel can all be shown to enact extraordinary experiments in freedom These experiments are all the more remarkable in view of the gender of their agents the historical situation of the author 1783 1842 and the conventions of the literary movement that his fiction helped to found realism Simone de Beauvoir s 1949 study of Stendhal s heroines gives preference to the reserved females

over his Amazons But existentialism as a philosophy of freedom also enables a reading of the self determining heroines that acknowledges the superiority of their choices their resistance and counter plots their paradoxical authenticity their rejection of seriousness and their assumption of responsibility for the routes they plot

Stendhal's Parallel Lives Francesco Manzini, 2004 This book deals with the important and hitherto neglected relationship between the works of Stendhal and Plutarch s Parallel Lives Stendhal s readings of Plutarch are shown to inform his literary representations of Revolution and Empire Restoration and Orleanism as well as his theorizations of Romanticism In particular the Plutarchan concept of Parallel Lives is used to analyse one of the major themes of Stendhal s writing the self construction of individual identity whether auto biographical or fictional by means of the emulation as distinct from the imitation of heroic exemplars As a consequence the balance between irony and idealism often identified by critics in Stendhal s work is shown rather to be an imbalance weighted in favour of an idealism derived from Plutarchan conceptions of heroism particularly as they are represented in the Lives of Julius Caesar and Marcus Brutus

Re-reading / La relecture Rachel Falconer, Andrew Oliver, 2012-03-15 What happens when we re read a familiar book Does the second encounter turn us into experts more knowing and confident in our relation to the text Or conversely does it expose the gaps and limits of each reading experience Does re reading affirm our own sense of identity reconnecting us to earlier memories or does it shock and destabilize revealing discontinuities between past and present selves Is re reading uncanny a discovery of the familiar in the unfamiliar or the reverse Do certain literary devices and tropes symbols allegories for example depend on re reading to be activated Are there some texts that can only be re read Re reading is rarely discussed in depth yet it forms the core of most conversations about literature for we rarely become passionate or critical about books we have only read once It is also re reading that consolidates a core of texts into what we recognise to be a canon of literature and it is re reading again that breaks open the canon and reshapes it We re read alone but we also re read communally in the shared space of the theatre or in the translation of a text from one culture to another or one medium to another Re reading is a necessary part of the professional reader s life yet there is often in the history of the individual scholar some formative relationship with a text read obsessively in childhood This bilingual volume of essays brings together an international group of eminent scholars in order to reflect on this process of re reading in honour of Graham Falconer Professor of 19th century French literature and long term re reader The essays vary from personal reflections on formative childhood reading and self reflexive scholarly re readings to analysis of the theme of re reading in texts and presentation of new theories of re reading Gustave Flaubert Honor de Balzac Stendhal Eug ne Fromentin Guy de Maupassant Marcel Proust Samuel Beckett Dostoevsky Mikhail Bakhtin W B Yeats William Blake Roland Petit H G Wells and Anthony Hope are amongst the authors re visited in these reflections on the practice of re reading
