The Case Of The Missing Link:

The Missing Link in Modern Spiritualism Ann Leah Underhill, 1885 *Glass House* Ken Ham, Bodie Hodge, 2019-02-20
Evolution as an idea is considered a rock solid truth among secular scientists but when you begin looking at the evidence and asking simple questions you find their conclusions to be just fragile assumptions unproven myth and outright misconceptions like a glass house built on shifting sands Discover the pervasive influences of the atheistic religion of Darwinian evolution Learn what science is and how science is actually devastating to evolution Explore how evolution developed from unproven science to a popular and cultural worldview Now a powerful team of credentialed scientists researchers and Biblical apologists take on the pillars of evolution and the truths they reveal decimate Darwin's beliefs using a Biblical and logical approach to evidence *Psychoanalysis of Technoscience* Hub Zwart, 2019 This book presents a psychoanalysis of technoscience Basic concepts and methods developed by Freud Jung Bachelard and Lacan are applied to case histories palaeoanthropology classical conditioning virology Rather than by disinterested curiosity technoscience is driven by desire resistance and the will to control Moreover psychoanalysis focusses on primal scenes Dubois quest for the missing link Pavlov's discovery of the conditioned reflex and opts for triangulation comparing technoscience to different scenes provided by novels so that Dubois's work is compared to missing link novels by Verne and London and Pavlov's experiments with Skinner's Walden Two while virology is studied through the lens of viral fiction *Perspectives on Science and Culture* Kris Rutten, Stefaan Blancke, Ronald Soetaert, 2018-02-15 Edited by Kris Rutten Stefaan Blancke and Ronald Soetaert *Perspectives on Science and Culture* explores the intersection between scientific understanding and cultural representation from an interdisciplinary perspective Contributors to the volume analyze representations of science and scientific discourse from the perspectives of rhetorical criticism comparative cultural studies narratology educational studies discourse analysis naturalized epistemology and the cognitive sciences The main objective of the volume is to explore how particular cognitive predispositions and cultural representations both shape and distort the public debate about scientific controversies the teaching and learning of science and the development of science itself The theoretical background of the articles in the volume integrates C P Snow's concept of the two cultures science and the humanities and Jerome Bruner's confrontation between narrative and logico scientific modes of thinking i.e. the cognitive and the evolutionary approaches to human cognition Directions in Relevant Logic J. Norman, R. Sylvan, 2012-12-06 Relevance logics came of age with the one and only International Conference on relevant logics in 1974 They did not however become accepted or easy to promulgate In March 1981 we received most of the typescript of IN MEMORIAM ALAN ROSS ANDERSON Proceedings of the International Conference of Relevant Logic from the original editors Kenneth W Collier Ann Gasper and Robert G Wolf of Southern Illinois University 1 They had most unfortunately failed to find a publisher not it appears because of overall lack of merit of the essays but because of the expense of producing the collection lack of institutional subsidization and doubts of publishers as

to whether an expensive collection of essays on such an esoteric not to say deviant subject would sell We thought that the collection of essays was still even after more than six years in the publishing trade limbo well worth publishing that the subject would remain undeservedly esoteric in North America while work on it could not find publishers it is not so esoteric in academic circles in Continental Europe Latin America and the Antipodes and quite important that we could get the collection published and furthermore by resorting to local means published comparatively cheaply It is indeed no ordinary collection It contains work by pioneers of the main types of broadly relevant systems and by several of the most innovative non classical logicians of the present flourishing logical period We have slowly re edited and reorganised the collection and made it camera ready
