## **The Great American Idea:**

**The Great American Mission** David Ekbladh, 2010 The Great American Mission traces how America's global modernization efforts during the twentieth century were a means to remake the world in its own image David Ekbladh shows that the emerging concept of modernization combined existing development ideas from the Depression He describes how ambitious New Deal programs like the Tennessee Valley Authority became symbols of American liberalism's ability to marshal the social sciences, state planning, civil society, and technology to produce extensive social and economic change For proponents it became a valuable weapon to check the influence of menacing ideologies such as Fascism and Communism Modernization took on profound geopolitical importance as the United States grappled with these threats After World War II modernization remained a means to contain the growing influence of the Soviet Union Ekbladh demonstrates how U.S. led nation building efforts in global hot spots enlisting an array of nongovernmental groups and international organizations were a basic part of American strategy in the Cold War However a close connection to the Vietnam War and the upheavals of the 1960s would discredit modernization The end of the Cold War further obscured modernization's mission but many of its assumptions regained prominence after September 11 as the United States moved to contain new threats Using new sources and perspectives The Great American Mission offers new and challenging interpretations of America's ideological motivations and humanitarian responsibilities abroad

**The Great American University** Jonathan R Cole, 2010-01-12 Although America's universities have become the envy of the world for their creative energy and their production of transformative knowledge few understand how and why they have become preeminent This groundbreaking book traces the origins and the evolution of our great universities It shows how they grew out of sleepy colleges at the turn of the twentieth century into powerful institutions that continue to generate new industries and advance our standard of living Far from inevitable this transformation was enabled by a highly competitive system that invested public tax dollars in university research and students while granting universities substantial autonomy Today America's universities face considerable threats Even greater than foreign competition are the threats from within the United States Under the Bush administration government increasingly imposed ideological constraints on the freedom of academic inquiry Restrictive visa policies instituted after 9/11 continue to discourage talented foreign graduate students from training in the United States The international financial crisis which has depleted university endowments and state investments in higher education threatens the vitality of some of our greatest institutions of higher learning In order to sustain and enhance the American tradition of excellence we must nurture this powerful yet underappreciated national resource
