Grammar Luc Steels, 2011 Construction Grammar is enthusiastically embraced by a growing group of linguists who find it a natural way to formulate their analyses But so far there is no widespread formalization of construction grammar with a solid computational implementation Fluid Construction Grammar attempts to fill this gap It is a fully operational computational framework capturing many key concepts in construction grammar The present book is the first extensive publication describing this framework In addition to general introductions it gives a number of concrete examples through a series of linguistically challenging case studies including phrase structure case grammar and modality The book is suited both for linguists who want to know what Fluid Construction Grammar looks like and for computational linguists who may want to use this computational framework for their own experiments or applications **The Outlook**, 1910 **The Green Mouse**
