**Planning Australia's Healthy Built Environments** Jennifer Kent, Susan Thompson, 2019-03-18

Planning Australia's Healthy Built Environments shines a quintessentially Australian light on the links between land use planning and human health. A burgeoning body of empirical research demonstrates the ways urban structure and governance influences human health and Australia is playing a pivotal role in developing understandings of the relationships between health and the built environment. This book takes a retrospective look at many of the challenges faced in pushing the healthy built environment agenda forward. It provides a clear and theoretically sound framework to inform this work into the future. With an emphasis on context and the pursuit of equity Jennifer L Kent and Susan Thompson supply specific ways to better incorporate idiosyncrasies of place and culture into urban planning interventions for health promotion. By chronicling the ways health and the built environment scholarship and practice can work together Planning Australia's Healthy Built Environments enters into new theoretical and practical debates in this critically important area of research. This book will resonate with both health and built environment scholars and practitioners working to create sustainable and health supportive urban environments.

humans since the country is so spacious so they just treat people like terrain and run across them Road Trains aren't long trucks but deadly avalanches unless one makes a step to the side And I explain the importance of carrying sufficient water because the Outback isn't just blue skies and wide open space but the largest sauna in the world In short Although Australia seems to be like home it is not This misapprehension can cost you your life Finally in order not completely deter the reader from traveling I'm recounting several good experiences For example about the drunken gargantuan Aborigines who found my tiny elderly mother who got lost at night when visiting and how they carefully guided her like a child And about three tourists standing alone at night in the middle of the desert with a fresh glass of champagne under the stars For readers impatient or just browsing I here summarize advice I deem most important Take preventive measures What is unsafe to do at home is unsafe away from home Let someone you trust know where you're going so they can alert someone should you not arrive as planned Tell them who to call and then contact them when you're back in safety Read warning signs and follow their advice Someone spent money and effort to put them there to save you Recognize places and situations where no warning sign has been put up but should have been Drink plenty of water and bring sufficient supplies Wear sunscreen Bring a jumper
