## **The Adolescent Experience:**

**The Adolescent Experience** Thomas P. Gullotta, Gerald R. Adams, Carol A. Markstrom, 1999-10-25 The Adolescent Experience places the college student at the very heart of the book. The authors engage in a dialogue with the reader that is warm, caring, and often humorous as they write and share material about this time of life. The authors emphasize the role that development and society play in the lives of young people. The book has a solid research basis with a historical and multicultural focus. But most important, the book is practical and applied, with the strongest prevention health promotion material available in any basic undergraduate adolescent psychology text currently on the market. Key Features: Focuses on health promotion and illness prevention. Provides not only a U.S. but also a much-needed Canadian perspective to this life stage. Involves students as participants in a long-standing inquiry into the nature of adolescence as they are introduced to the latest research in the field. Provides students with the latest practical information in subject areas like sexuality, drugs and alcohol, suicide and depression, eating disorders, crime, delinquency, and violent behavior. List server links student and/or instructor to authors. Explores the uniqueness of North America's multiculturalism. Illustrates important concepts using literature and social history to make them tangible to students.

**The Adolescent Experience** Elizabeth Douvan, Joseph Adelson, 1966

**The Adolescent Experience** August Flammer, Francoise D. Alsaker, 2014-05-30 The opening of the borders to Eastern Europe has expanded our view on European diversities and offered new opportunities to examine the effects of the heterogeneity in European cultural backgrounds and political systems on personality and social development. This book is a first step in utilizing the rich cultural resource offered by the large number of cultural units represented in Europe and at least in part in the United States. One way to understand the life conditions of adolescents in different countries is to study what they actually do in everyday life and how much time they spend on what types of activities. This book also provides essential and new information about individual and societal priorities and values. Toward this end, the Euronet scientists set up a postdoctoral training workshop on adolescent psychology for 10 selected American and 10 selected European participants. The Euronet project comprises 13 different samples: six stemming from Middle and Eastern European countries (Bulgaria, the Czechoslovakian Federal Republic, Hungary, Poland, Russia, and Romania); six from Western European countries (Finland, France, Germany, Norway, French and German Switzerland) and one from the United States (Michigan). This book reports the results of this large cross-national longitudinal study of adolescents and the world(s) in which they live and is offered to all those who have an interest in adolescence and/or the diversity of Europe. Readers will learn about hundreds of features of adolescence which are more or less characteristic of the cultures, ages, and genders.
