Soviet Military Strategy in Europe Joseph D. Douglass, 2013-10-22 Soviet Military Strategy in Europe focuses on the development form and content implications for international relations and goal of Soviet military plan in Europe. The book first discusses the foundation of Soviet military thought and revolution in Soviet military affairs including basic concepts of the Marxist-Leninist ideology. Soviet study of military affairs, nuclear revolution and scientific and technical revolution. The publication also concentrates on Soviet study of laws and principles of military art and forces and primary operational concepts. Topics include laws of the first order naval and air operations, nuclear strike and conventional war considerations. The manuscript ponders on command and control as well as combat modeling, survivability, coordination, centralization and attack of NATO command and control. The book also reviews the issues of Soviet military strategy toward Europe and special Soviet problems. Topics include role of nuclear weapons, chemical warfare options, escalation to intercontinental war, NATO nuclear threat, nuclear weapon stockpile and superiority, and war initiation. The publication is a dependable reference for readers interested in the Soviet military scheme in Europe.

Target America Steve Zaloga, 1993 From the development of the A-bomb and the role of espionage surrounding it to the dire environmental consequences of its nuclear power program, the development of nuclear technology and weaponry in the former Soviet Union is impressively researched in this important pioneering study. Britain and Disarmament John R. Walker, 2016-04-15 Since the use of poison gas during the First World War and the dropping of atomic bombs on Japan at the end of the Second World War, nuclear, biological or chemical NBC weapons have registered high on the fears of governments and individuals alike. Recognising both the particular horror of these weapons and their potential for inflicting mass death and destruction, much effort has been expended in finding ways to eliminate such weapons on a multi-lateral level. Based on extensive official archives, this book looks at how successive British governments approached the subject of control and disarmament between 1956 and 1975. This period reflects the UK's landmark decision in 1956 to abandon its offensive chemical weapons programme, a decision that was reversed in 1963 but never fully implemented, and ends with the internal travails over the possible use of CS tear gas in Northern Ireland. Whilst the issue of nuclear arms control has been much debated, the integration of biological and chemical weapons into the wider disarmament picture is much less well understood, there being no clear statement by the UK authorities for much of the period under review in this book as to whether the country even possessed such weapons or had an active research and development programme. Through a thorough exploration of government records, the book addresses fundamental questions relating to the

history of NBC weapons programmes including the military economic and political pressures that influenced policy the degree to which the UK was a reluctant or enthusiastic player on the international arms control stage and the effect of international agreements on Britain's weapons programmes In exploring these issues the study provides the first attempt to assess UK NBC arms control policy and practice during the Cold War Analyzing Soviet Strategic Arms Decisions Karl F. Spielmann,2019-03-13 The importance to Western policymakers of determining the significance of Soviet strategic arms decisions is matched by the difficulty of doing so The high stakes involved and in many cases the inadequacy of evidence can all too easily lead to generalizations that rest more on passionate conviction than on accepted principles of scholarly inquiry

The Military Strategy of the Soviet Union David M. Glantz,2001-09 This study of Soviet military strategy is based upon the relationship between the army and politicians as well as Soviet writings on the subject of military strategy Thanks to the policy of glasnost it incorporates Soviet materials hitherto unavailable in the West It should not be considered simply as a retrospective account of what was it forms at least part of the context for what will be in the future **Strategic Power** Ken Booth,David R. Jones,1990 *Target America* Steven J. Zaloga,1993-06-01 Provides a detailed examination of how the former Soviet Union became a superpower Takes the reader step by step through the development of Soviet nuclear weapons technology and the development of the systems needed to deliver those weapons to targets in the US Drawing on secret recently declassified Soviet documents and articles as well as recent revelations from KGB and CIA files Zaloga sheds new light on the role of Klaus Fuchs and the Rosenbergs the so called atomic spies of the late 40s and early 50s A chapter on the 1962 Cuban missile crisis provides a unique perspective on that critical Cold War showdown Photos **Soviet Strategic Arms Policy Before SALT** Christoph Bluth,1992-03-12 In this book Dr Christoph Bluth presents an original analysis of the build up of Soviet strategic forces from the death of Stalin to the SALT I agreement The author is able to demonstrate how domestic priorities and internal power struggles account for the seeming inconsistencies of Soviet military and foreign policy

USSR, Analytical Survey of Literature United States. Department of the Army,1976 **The Soviet Union and Arms Control** Roman Kolkowicz,Matthew P. Gallagher,Benjamin S. Lambeth,1970 **The Changing Strategic Military Balance, U.S.A. Vs. U.S.S.R.** American Security Council. National Strategy Committee,1967 *Soviet Strategy* John Baylis,Gerald Segal,2021-01-26 This book first published in 1981 is an analysis of the Soviet Union's military strategy taking in both sides of the hawks and doves views of the USSR's intentions It examines the Soviet approach to nuclear war defence and deterrence in the nuclear age and the calculation of risk in the use of the military instrument One of the main themes running through the chapters is that although the Soviet Union clearly does not view military issues in the same way as does the West their approach is not necessarily aggressive and dangerous in all respects **USSR: Strategic Survey** United States. Department of the Army,1969 Negotiating START Kerry M. Kartchner, The United States and the Soviet Union have been negotiating nuclear arms control agreements for over twenty years yet radical differences remain in the two sides

concept of and approaches to strategic stability and arms control. This book compares and contrasts those approaches using START Strategic Arms Reduction Treaty as a case study. Throughout two decades of negotiation U S policy has been directed toward dialogue that would encourage convergence of American and Soviet thought on nuclear deterrence. In Kartchner's view that hope is belied not only by continuing asymmetries in the development and deployment of their strategic nuclear arsenals but by differing U S and Soviet negotiating positions. The Reagan administration viewed START as a means of repudiating SALT II, restoring a measure of balance in the U S Soviet strategic competition and as a way of closing the so called window of vulnerability. In contrast Kartchner analyzes the Soviets differing views of nuclear balance emphasizing their satisfaction with SALT II and a strategic equilibrium shaped by a decade of bilateral arms control. Kartchner offers a detailed exposition of the major negotiating issues in START contrasting concerns of U S and Soviet negotiators. Not surprisingly each side's agenda was dominated by weapon systems that figure prominently in the other's development program. The author concludes by summarizing and comparing American and Soviet quests for stability and drawing up an assessment of U S efforts in both SALT and START to use arms control negotiations as a kind of classroom for instructing Soviet officials in American notions of stabilizing versus destabilizing weapon technology and America's own ethnocentric view of stability. START will profoundly affect the acquisition, operation, maintenance and cost of U S strategic nuclear forces well into the next century. The history and analysis presented here will provide an essential source to policymakers and students of military political relations for much needed further study of this treaty's implications.

National Security, Military Power & the Role of Force in International Relations United States. Department of the Army, 1976

Soviet Military Thinking Derek Leebaert, 2021-01-26 This book first published in 1981 examines the influences affecting Soviet military thinking, planning and theory in the later Cold War. It offers for the first time an insight into the range of premises and calculations surrounding the Soviet conception of power and makes the connection between Soviet studies and military strategy a link often missed in the West. It discusses comparative doctrines, cultural differences, arms control and specific security challenges between East and West.

The Dynamics of World Power: Eastern Europe and the Soviet Union, edited by W. LaFeber Arthur Meier Schlesinger (Jr.), 1973

US Strategic Arms Policy in the Cold War David Tal, 2017-05-08 This book examines the negotiations between the USA and the USSR on the limitation of strategic arms during the Cold War from 1969 to 1979. The negotiations on the limitation of strategic arms which were concluded in two agreements SALT I and SALT II with only the first ratified marked a major change in the history of arms control negotiations. For the first time in the relatively short history of nuclear weapons and negotiations over nuclear disarmament the two major nuclear powers had agreed to put limits on the size of their nuclear strategic arms. However the negotiations between the US and USSR were the easy part of the process. The more difficult part was the negotiations among the Americans. Through the study of a decade of negotiations

on the limitation of strategic arms in the Cold War this book examines the forces that either allowed US presidents and senior officials to pave a path toward a US arms limitation policy or prevented them from doing so Most importantly the book discusses the meaning of these negotiations and agreements on the limitation of strategic arms and seeks to identify the intention of the negotiators Were they aiming at making the world a safer place What was the purpose of the negotiations and agreements within US strategic thinking both militarily and diplomatically Were they aimed at improving relations with the Soviet Union or only at enhancing the strategic balance as one component of the strategic nuclear deterrence between the two powers This book will be of much interest to students of Cold War history arms control US foreign policy and international relations in general
