A New Europe, 1918-1923 Bartosz Dziewanowski-Stefańczyk, Jay Winter, 2022-03-03 This set of essays introduces readers to new historical research on the creation of the new order in East Central Europe in the period immediately following 1918 The book offers insights into the political diplomatic military economic and cultural conditions out of which the New Europe was born Experts from various countries take into account three perspectives They give equal attention to both the Western and Eastern fronts they recognise that on 11 November 1918 the War ended only on the Western front and violence continued in multiple forms over the next five years and they show how state building after 1918 in Central and Eastern Europe was marked by a mixture of innovation and instability Thus the volume focuses on three kinds of narratives those related to conflicts and violence those related to the recasting of civil life in new structures and institutions and those related to remembrance and representations of these years in the public sphere Taking a step towards writing a fully European history of the Great War and its aftermath the volume offers an original approach to this decisive period in 20th century European history

Occupied Economies Hein A.M. Klemann, Sergei Kudryashov, 2013-05-09 What were the consequences of the German occupation for the economy of occupied Europe After Germany conquered major parts of the European continent it was faced with a choice between plundering the suppressed countries and using their economies to supply its needs The choices made not only differed from country to country but also changed over the course of the war Individual leaders the economic needs of the Reich the military situation struggles between governors of occupied countries and Berlin officials and finally racism all had an impact on the outcome In some countries the emphasis was placed on production for German warfare which kept these economies functioning New research presented for the first time in this book shows that as a consequence the economic setback in these areas was limited and therefore post war recovery was relatively easy However in other countries plundering was more characteristic resulting in partisan activity a collapse of normal society and a dramatic destruction not only of the economy but in some countries of a substantial proportion of the labour force In these countries post war recovery was almost impossible

Europe's Third World Derek H. Aldcroft, 2016-04-29 Economic historians have perennially addressed the intriguing question of comparative development asking why some countries develop much faster and further than others Focusing primarily on Europe between 1914 and 1939 this present volume explores the development of thirteen countries that could be said to be categorised as economically backward during this period Albania Bulgaria Estonia Greece Hungary Latvia Lithuania Poland Portugal Romania Spain Turkey and Yugoslavia These countries are linked not only in being geographically on Europe's periphery but all shared high agrarian components and income levels much lower than those enjoyed in western European countries The study shows that by 1918 many of these countries had structural characteristics

which either relegated them to a low level of development or reflected their economic backwardness characteristics that were not helped by the hostile economic climate of the interwar period It explores region by region how their progress was checked by war and depression and how the effects of political and social factors could also be a major impediment to sustained progress and modernisation For example in many cases political corruption and instability deficient administrations ethnic and religious diversity agrarian structures and backwardness population pressures as well as international friction were retarding factors In all this study offers a fascinating insight into many areas of Europe that are often ignored by economists and historians It demonstrates that these countries were by no means a lost cause and that their post war performances show the latent economic potential that most harboured By providing an insight into the development of Europe s periphery a much more rounded and complete picture of the continent as a whole is achieved *Professionen im modernen Osteuropa* Charles E. Geschichtswissenschaft ,1996 **Property in East Central Europe** Hannes Siegrist, Dietmar Müller, 2014-11-01 Property is a complex phenomenon comprising cultural social and legal rules During the twentieth century property rights in land suffered massive interference in Central and Eastern Europe The promise of universal and formally equal rights of land ownership ensuring predictability of social processes and individual autonomy was largely not fulfilled The national appropriation of property in the interwar period and the communist era represent an onerous legacy for the postcommunist re construction of a liberal individualist property regime However as the scholars in this collection show after the demise of communism in Eastern Europe property is again a major factor in shaping individual identity and in providing the political order and culture with a foundational institution This volume analyzes both historical and contemporary forms of land ownership in Poland Romania and Yugoslavia in a multidisciplinary framework including economic history legal and political studies and social anthropology Deutsch-serbische Beziehungen vom Berliner Kongress bis heute Michael-Zikic-Stiftung. Die europäische Stadt im 20.
